if you imagine it, we can create it

ABOUT OUR CONTENT MANAGEMENT SYSTEM

T1Visions' Content Management System (CMS) is incredibly simple and efficient. The system is designed to aid content managers in publishing content quickly and effectively, and to reach multiple audiences dispersed around the globe.

› Cloud-based system allows content managers to upload and manage content across any number of screens dispersed across multiple locations

› Create playlists with mixed media – still images, video, and animated text graphics

› Schedule playlist start times or push content in real-time

› Group screens based on time zone / region / type of store, and publish content updates for those targeted audiences

› Assign tiered user permissions (view, upload, publish, manage)

› Snapshot button provides live content feed for managers to confirm updates or changes
