## **NEC DISPLAY, T1V ANNOUNCE COLLABORATION SOLUTIONS FOR EDUCATION, SMALL BUSINESS AND CORPORATE MARKETS**

### ***NEC Collaboration Powered by ThinkHub Makes Meetings More Productive***

**CHICAGO – September 7, 2016** – [NEC Display Solutions of America](#), a leading provider of commercial LCD display and projector solutions, and [T1V](#), an interactive software company, today announced a set of collaboration solutions that improve the productivity and efficiencies of meetings, giving users a foundation for delivering more value to their organizations. The bundled products represent an industry first: combining a touchscreen produced by a major LCD display manufacturer with award-winning interactive collaboration software.

The NEC Display/T1V solutions bundles include an NEC touch-interactive 55-inch, 70-inch or 80-inch display combined with the choice of T1V ThinkHub Base software, which provides two wireless device connections over a LAN network, or ThinkHub Standard software, which provides unlimited wireless device connections over any network in the world.

The NEC multi-touch displays offer superior, commercial-grade build, easy integration and an interactive design that provides users with the ultimate interactive tool. To further

customize the bundles, wall mounts, mobile carts, cameras, support packages and upgrade options are also available.

“Our partnership with T1V delivers a set of tools that enhance business results,” said Richard Ventura, Vice President of Business Development and Solutions at NEC Display. “Professionals at educational institutions and in corporations gain important capabilities to make their collaboration, both in person and remotely, much more productive and fulfilling.”

Built with ease of use and customers in mind, T1V’s ThinkHub is a dynamically configurable workspace that enables users to protect their meetings with passwords, take notes, use multi-touch web browsers, convene video conferences, and connect a multitude of devices wirelessly to the NEC displays. ThinkHub supports laptops, tablets and smart phones across all major platforms including Windows, macOS, iOS, and Android – a differentiator in the market – through its AirConnect™ app. In addition, its Auto-Present Mode lets users leverage their own devices as presentation tools on the NEC digital screens.

“From an early stage, ThinkHub was designed to complement the many different devices and applications that people use to collaborate,” said Marco Ventura, Vice President of Sales and Marketing at T1V. “Through our partnership with NEC, ThinkHub’s powerful collaboration capabilities will be accessible to a much broader audience, while helping teams to consolidate the devices, applications, people, ideas, and content that are critical to achieving great work.”

To learn more about the NEC Display/T1V solutions bundles, sold through CDW, please visit [NEC Display](#) on the web, email [thinkhub@necdisplay.com](mailto:thinkhub@necdisplay.com), or call (866) NEC-MORE.
