

**AGT and T1V Partner to Deliver Interactive Touchscreen Display Experiences**  
*Leading Audio Visual Systems Integrator to Become Reseller of T1V Technology*

**Charlotte, NC (May 9, 2016)** – Applied Global Technologies (AGT), a full-service [audio visual \(A/V\) integrator](#) that designs, installs and manages collaboration environments, today announces its partnership with [T1V](#) – a leading provider of interactive touchscreen technology. Together the companies will deliver interactive touchscreen display solutions, along with A/V design, integration and management services, to improve the way organizations communicate and collaborate. AGT will act as an official reseller and distributor of T1V interactive technology – including the company’s suite of collaboration software offerings which are designed to help drive innovation and business success – in Georgia, Florida, Colorado and beyond.

T1V technology is powered by patented multitouch, multiuser software that transforms public spaces into more dynamic environments and delivers large-scale interactive experiences – its core products include interactive tables, digital signage, interactive walls and software applications. [ThinkHub](#) – T1V’s multiuser software which transforms traditional meetings into more proactive, effective sessions, is among its most popular applications. The company’s suite of standard software applications, such as Interactive Timeline and Interactive Map, can be customized to align with a customer’s brand identity. In this capacity, the customer is able to design their interactive solution at an affordable price point. T1V has the flexibility to scale its solutions from single-panel to multipanel, and can work within standard or custom frameworks. The company supports its customers from its headquarters in Charlotte, North Carolina.

As T1V’s integration partner, AGT’s team of certified and experienced [A/V experts](#) can successfully design, integrate and manage collaboration environments – whether it is briefing centers, board rooms, small huddle spaces, intuitive classrooms or state-of-the-art training facilities – with T1V interactive technology, enabling customers to experience the immersive world of touchscreen collaboration.

“AGT strives to bring our customers the most cutting-edge and trusted solutions on the market to help them collaborate in a way that works best for them,” says Mark Cray, CEO of AGT. “Although interactive touchscreen display technologies have evolved tremendously over the past few years, there has been a lack of quality software applications paired with these devices to drive truly effective collaboration experiences. That is where T1V comes in – we think the ThinkHub software really propels interactive touchscreen display technology forward. We are excited to provide our customers with T1V interactive solutions and to support theirs with our A/V design, integration and managed services expertise.”

“T1V is thrilled to partner with AGT, a company who shares our vision for how technology can improve the way organizations communicate and collaborate, and who can help us to drive our product forward with their expertise in the space,” says Marco Ventura, Vice President of Sales and Marketing at T1V. “ThinkHub, T1V’s interactive collaboration software, was developed to help teams to ideate, collaborate and innovate. We look forward to working with AGT in helping to address customer needs from the board room to the huddle room with our interactive collaboration solutions.”
