ThinkHub xCANVAS™

ideate. collaborate. innovate. visualize.

Use ThinkHub to visualize and manipulate large amounts of data and content with your team. Toss content across the room from one display to another with touch gestures or via the T1V app.

THINKHUB xCANVAS ENABLES TEAMS TO:

> Transform your room into a fully immersive experience

> Leverage non-touch displays for interactive collaboration

> Visualize mass amounts of content and data to see the whole picture

> Present content that engages your audience

> Work through content and ideas with the ability to move content from wall to wall

> Rapidly brainstorm and idea capture with an unlimited digital Canvas

CORE USE CASES:

> Customer Experience Centers

> Executive Briefing Centers

> Visualization Labs

> Innovation Labs

> Command + Control Centers

> Design Thinking Spaces

> Product Development Labs

KEY FEATURES

› Touch + Non-Touch

Displays can be touch or non-touch; non-touch displays must be controlled via a tablet or dedicated in-room touch panel.

› Intuitive Interaction

Use touch gestures to 'toss' content from one display to another, or use a tablet or dedictated in-room touch panel to control placement of content assets.

› SmartGrids™

Once a content asset is dropped in the designated drop zone, the asset will snap into place at largest size and resolution.

› Full Screen

Tap on any asset to view in full screen on its current display.

› Multiple Canvas Menus

Access all ThinkHub functionality no matter which screen you're on, or where in the xCanvas room you're standing.

› T1V App Control

T1V app functions as a remote control whether you're in the room or operating remotely; use T1V to send notes, URLs, and files to the ThinkHub xCanvas.
