# QVUE™ WAITLIST APP
ENGAGE CUSTOMERS WHILE THEY WAIT

QVue is the mobile waitlist app. Customers can join your location's queue from the convenience of their mobile device.

Here's a look at how patrons of **The Cowfish Sushi Burger Bar** are using **QVue:**

STEP 1
Download the app from the App Store.

STEP 2
Join the waitlist and specify dining preferences.

Tap "Reserve."

In **QVue,** customers can also **view the menu, fill out a survey** of your choice, or **complete their profile** to receive updates on **future events** and **promotions.**

STEP 3
The customer's place is reserved! Customers are assigned a branded avatar.

STEP 5
The closer the person is to being seated, the larger the fish will appear. Once it's **time to be seated,** the fish will be netted out of the tank!

STEP 4
While waiting, visitors can look for their fish in the shared "fish tank", or watch on their mobile device.

Choose from one of our three standard themes, or create a custom theme for your brand.
