Avocor and T1V Partner to Deliver Visual Collaboration Solutions for Manufacturing, Architecture, and Construction Teams

Charlotte, NC — January, 6th, 2026 — [Avocor](#), a global leader in interactive display solutions, and [T1V](#), a pioneer in visual collaboration software, today announced a strategic partnership designed to help manufacturing, architecture, and construction teams collaborate more effectively and make faster, more informed decisions throughout the project lifecycle.

Together, Avocor and T1V deliver an integrated solution that combines large-format, high-clarity interactive displays with powerful visual collaboration software, purpose-built for teams that rely on complex drawings, models, workflows, and technical data to get work done.

In industries where decisions are made around blueprints, CAD files, renderings, and production plans, traditional collaboration tools often fall short. Small screens, disconnected systems, and limited interactivity can slow approvals, increase miscommunication, and lead to costly rework. The Avocor + T1V partnership addresses these challenges head-on by providing a shared digital workspace that brings technical visuals to life.

“Partnering with T1V highlights our dedication to providing top-tier, integrated solutions for teams working with complex visuals,” said Dana Corey, SVP and Global GM at Avocor. “By bringing together our large-format interactive displays and T1V’s visual collaboration platform, we are providing manufacturing, architecture and construction teams with solutions at full scale, improving communication and collaboration, speeding up decision making from design to execution.”

The combined solution enables teams to:

- Visualize complex drawings and models at full scale
- Collaborate in real time across departments and locations
- Reduce miscommunication and rework through shared context
- Accelerate decision-making from design through execution

The partnership is already delivering results for organizations such as [RPM](#), where teams are using Avocor displays paired with T1V software to connect distributed stakeholders, visualize complex information, and streamline collaboration across engineering and innovation spaces.

Avocor and T1V will continue to collaborate on joint marketing initiatives, live demonstrations, and thought leadership focused on the evolving needs of manufacturing, architecture, and construction teams.

About Avocor

Avocor is a global leader in collaboration technology, designing interactive displays that enable seamless communication and teamwork across enterprise, education, and specialized environments. Avocor solutions are built to deliver clarity, reliability, and performance for modern collaboration spaces.

Avocor and T1V will showcase their integrated solution and dive deeper into the partnership at [ISE 2026](#), where attendees can experience live demonstrations and real-world use cases tailored to manufacturing, architecture, and construction environments. Visitors will see firsthand how large-format interactive displays paired with T1V's visual collaboration software help teams align faster, reduce rework, and make better decisions throughout the project lifecycle.
