

# 10 CORPORATE TEAMS THAT CAN BENEFIT FROM ThinkHub™

Employee engagement and communication is key to any successful business. That's why we developed ThinkHub as a way to motivate employees and get teams collaborating. Here are ten teams that can benefit from using ThinkHub collaboration software:

## OPERATIONS

Host faster, more efficient meetings that generate more productive employees. ThinkHub's remote collaboration capabilities provide a way for multiple branches to communicate, reducing travel between locations.

## MARKETING

Inspire your team with more dynamic and creative brainstorming sessions. Share creative assets for real-time review and feedback.

## HUMAN RESOURCES

Keep employees involved and satisfied with motivational messages, employee feedback, or announcements for upcoming events, birthdays, achievements and more.

## SALES

Engage customers with an immersive platform to showcase products. Save money on travel and shipping with a digital showroom.

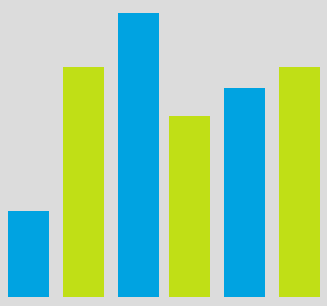

## CUSTOMER SERVICE

Utilize ThinkHub onsite as a tool to assist in answering FAQs or receive feedback from customers. Provide fast and efficient remote support with ThinkHub MultiSite and videoconferencing capabilities.

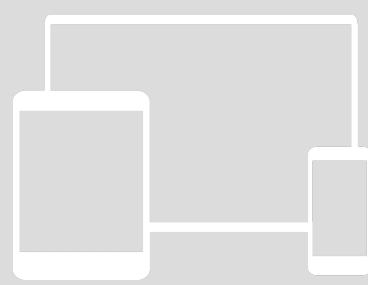

## COMMUNICATIONS

Improve internal communications with high quality images, video announcements, and interactive content.

## EXECUTIVES

When employees are engaged and informed, success rate is higher. Satisfied employees lead to higher productivity and lower turnover rates, making a positive impact on the big picture.

## IT

Easy communication between devices allows for you to implement a BYOD policy that lets employees use the devices they feel most comfortable with.

## ACCOUNTING

Keep everyone up to date on metrics with graphs and presentations. ThinkHub makes it easy to consolidate, review and compare reports to ensure they are accurate.

## PRODUCTION

Keep your workforce up to date with regulations, procedures, training videos, and more with ThinkHub's intuitive interface.
