

CORE USE CASE

ThinkHub drives hybrid collaboration and visualization across engineering and executive teams.

DATE OF ACTIVATION

February 2022

LOCATION

Spring, TX

INDUSTRY

Information Technology (IT)

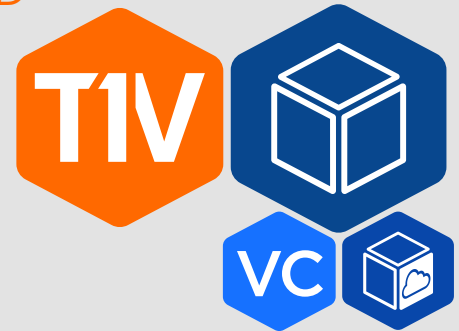

DESCRIPTION

Hewlett Packard Enterprises achieves a higher level of real-time collaboration between its executive and engineering teams with ThinkHub. The ThinkHub Canvas supports massive amounts of content, and — coupled with integrated Zoom video conferencing — the teams are able to streamline workflows for a better collaboration experience.

- > (1) 8x1 multipanel ThinkHub interactive wall located in the “3P” (3 Panel) Lab + (1) 85” ThinkHub located in an executive level conference room
- > Executive meetings boast enhanced sharing capabilities and higher level of control over shared content including the use of dashboards to view live content and projects via Sharepoint
- > Facilitates live content sharing from multiple Go-Pro cameras in different areas of the building for real-time feedback on equipment and troubleshooting
- > Executive run meetings boast enhanced sharing capabilities + higher level of control over shared content, including the use of dashboards, viewing live content, and projects using Sharepoint
- > The Engineering team makes extensive use of the annotation tools as they are able to make notes on important diagrams, drawings, and other forms of visual content
