T1V Launches CollaboratOR 3D App for Apple Vision Pro in Partnership with KARL STORZ

T1V has developed its first Apple Vision Pro app in partnership with KARL STORZ, the company's strategic partner in the medical industry. The app is now available for download on the App Store.

T1V is excited to announce the release of its first app designed for Apple Vision Pro.

The CollaboratOR 3D app was developed in collaboration with longtime MedTech partner KARL STORZ. As a leader in minimally invasive surgical technology, KARL STORZ identified a need to improve the education and collaboration experience for the rising class of surgical residents and practicing surgeons. With CollaboratOR 3D for Apple Vision Pro, surgical staff can immerse themselves in 3D/4K content from surgical procedures—without even entering the operating room. This provides residents and surgeons access to an enhanced learning tool, while allowing teams to scale their curriculum by means of a more powerful and accessible tool. The CollaboratOR 3D serves as an extension of the CollaboratOR, an interactive ecosystem and console for the OR1 integrated operating room supplied by KARL STORZ.

Designed to take full advantage of the powerful capabilities on Apple Vision Pro, the app displays CollaboratOR content, provided by KARL STORZ endoscopy systems in exceptional 3D/4K surgical video quality. In short, it's a visual match made in heaven.

“We are thrilled to work with KARL STORZ to explore the future of technology in medical education and collaboration in the OR using Apple Vision Pro,” says Jim Morris, T1V CTO. He continues, “Our company prides itself on innovation, and it's powerful to be part of something that can have a very real impact on human lives.”

“KARL STORZ has built a reputation for exceptional surgical visualization and integration technologies,” says Christy Gaudet, VP of Surgical Sales & Marketing at KARL STORZ. “The CollaboratOR serves to boost efficiency in the operating room while empowering greater collaboration for the entire surgical staff, from any location, for any surgical specialty. The new CollaboratOR 3D app for Apple Vision Pro developed with our partners at T1V takes this to the next level, with clear benefits for healthcare providers and their patients.”

Apple Vision Pro technology unlocks an unprecedented spatial experience, and T1V is incredibly encouraged by the enormous potential of the new platform. The company plans to continue development
