## T1V Launches ThinkHub Cloud for Remote and Hybrid Collaboration at InfoComm 2022

***T1V announces the launch of its ThinkHub Cloud solution, expanding the ThinkHub platform to include cloud-based collaboration that is compatible with ThinkHub Room solutions. ThinkHub Cloud is available as a free download on t1v.com, with the option to upgrade to ThinkHub Cloud Enterprise through pro AV integration partners.***

T1V has launched [ThinkHub Cloud collaboration software as a service](#). ThinkHub Cloud brings the benefits of [ThinkHub collaboration software](#) to the convenience of your laptop. For remote workers and hybrid teams, the software provides a way to connect and visually collaborate - synchronously or asynchronously - with team members as if they were all in the same place.

ThinkHub Cloud is fully compatible with ThinkHub Rooms, meaning collaborators can transfer collaborative Canvases from cloud to room with ease.

“ThinkHub Cloud is a total game changer for our customers,” says Adam Loritsch, T1V EVP of Sales and Marketing. He continues, “After two years of navigating the hybrid work model, we now know this is more than a trend - it’s a new reality we are actively shaping with and for our customers. In partnering closely with our customer base, we’ve identified top pain points in hybrid meetings, and we’re confident ThinkHub Cloud provides the flexibility organizations are looking for as they return to work. We look forward to working with the pro AV community to expand our stake in the collaboration market with this new offering.”

Like ThinkHub Room, ThinkHub Cloud features a large digital Canvas, and built in tools like Notes, Sketches, and Web Browsers. And perhaps most importantly - the ability to share an unlimited amount of content and mirrored device screens into the Canvas. Using the T1V app, collaborators can create and share ThinkHub Cloud Canvases with their teams. These Canvases can be worked on in live sessions, or asynchronously between meetings.

A unique benefit of ThinkHub and something that no one else in the collaboration space is doing, is providing its users the ability to share, view, and collaborate simultaneously on live Google Workspace / O365 documents and view YouTube videos in total synchronization. This capability is available in the free version.

## **About T1V**

T1V is a visual collaboration company specializing in hybrid collaboration software for enterprise and education markets. The company's collaboration platform includes ThinkHub® collaboration for global workspaces and the T1V app - working cohesively to bring teams together for seamless, intuitive working sessions.

T1V's suite of collaboration software transforms the way people meet - making meetings a place where teams can collaborate anytime, anywhere.

T1V ThinkHub Education™ technology is designed to support active learning across a variety of teaching and learning styles, from traditional lecture to team-based teaching and learning. The solution also connects satellite classrooms, campuses, and remote participants to improve access for students and teachers.

T1V Story™ enables brands to visually tell their story in an engaging, interactive format. Story couples the visual power of mixed media with the brand's unique look and feel to create a totally branded, one-of-a-kind experience.

All T1V solutions are Built for BYOD™ (bring your own device) to support the many devices, programs, and platforms of today's hybrid meeting and learning environments. T1V is a leading innovator in large-scale, interactive software technology, with 15 issued patents in visual collaboration software.
