T1V and AVer Launch Strategic Partnership, Will Exhibit Solutions at ISE 2023

T1V has formed a strategic partnership with AVer to optimize the hybrid meeting space. Together, T1V ThinkHub visual collaboration and AVer video technology are positioned to deliver a best-in-class hybrid meeting solution for working and learning spaces. The solutions will be exhibited in T1V Booth 2V125, January 31 - February 3 at the Fira Barcelona Gran Via in Barcelona, Spain.

T1V and AVer have partnered to deliver hybrid collaboration technology that brings meeting equity to distributed teams. T1V will be exhibiting at ISE 2023 Booth 2V125, featuring its [ThinkHub visual collaboration software](#) across a range of touch displays. Each of these displays will be paired with the AVer [CAM130](#) or [VB130](#) to demonstrate the seamless integration of AVer video technology within the ThinkHub visual collaboration platform.

“We’re excited to partner with AVer, whose technology brings incredible value to the ThinkHub collaboration experience,” says Jim Morris, T1V CTO. He continues, “as our customers are looking to optimize their meeting spaces for hybrid teams, AVer’s SmartFrame technology ensures all team members are visible when collaborating with one another.”

ThinkHub supports unlimited content, devices, and collaborators — enabling synchronous and asynchronous collaboration for globally distributed teams. Whether supporting collaboration in the physical meeting room or hosting hybrid or cloud-based virtual sessions, ThinkHub provides teams a solution that works for participants regardless of their location.

We are thrilled to support T1V’s truly collaborative platforms for the hybrid and virtual meeting room markets with our leading camera technologies,” says Dave Adams, National OEM Sales Director for AVer. “This partnership opens new doors for innovative development utilizing T1V’s platform and AVer AI based cameras.”

AVer CAM130: The CAM130 is a compact, portable 4K camera with a built-in light and microphone for remote work, home offices and small conference rooms.

AVer VB130: The VB130 is an advanced, enterprise video collaboration bar designed for small to medium collaboration spaces. Includes 4K video, built-in lighting, speaker and microphone and AI features such as audio fencing, voice tracking, and SmartFrame technology.

T1V will be exhibiting in Booth 2V125. The company also has ThinkHub software on display at the GPA Global Lounge in the Europa Suite (between Halls 2 and 3), Planar Booth 3D800, and Displax Booth 3S400. Each of these stands will feature ThinkHub collaboration software running on the latest touch display technology, and highlighting the flexibility of T1V ThinkHub software across different hardware deployments. Whether outfitting a huddle or small meeting space all the way up to an innovation lab or executive briefing center, ThinkHub supports collaborative spaces of all shapes, sizes, and use cases.
