T1V to Introduce ThinkHub 21:9 at Integrated Systems Europe 2023

T1V will showcase ThinkHub visual collaboration software at Integrated Systems Europe 2023 Booth 2V125 — shown for the first time on a 21:9 ultrawide touch display. The ISE23 exhibit hall will be open January 31 - February 3 at the Fira Barcelona Gran Via in Barcelona, Spain.

T1V will showcase [ThinkHub 21:9 visual collaboration software](#) for hybrid collaboration at ISE 2023. For the first time, visitors will experience ThinkHub on the all-new Avocor ultra-wide 21:9 touch display. The new aspect ratio offers an expansive digital workspace that pairs perfectly with ThinkHub's large, interactive Canvas.

The ThinkHub Canvas supports unlimited content, devices, and collaborators — enabling synchronous and asynchronous collaboration for globally distributed teams. Whether supporting collaboration in the physical meeting room or hosting hybrid or cloud-based virtual sessions, ThinkHub provides teams a solution that works for participants regardless of their location.

"We can't wait to get back to ISE," says Adam Loritsch, T1V EVP of Sales and Marketing. He continues, "we're eager to connect with our global partners and showcase ThinkHub on the 21:9 touch display — we're confident we've got a winning combination for the hybrid workspace that helps teams work better, together."

In addition to launching ThinkHub 21:9, T1V will also be showcasing [ThinkHub Cloud](#) and [T1V Story](#). ThinkHub Cloud is available as a free download, offering the same ThinkHub experience from the convenience of your laptop. Co-create and collaborate with your hybrid team with ThinkHub Cloud Canvases — where you can add content and invite collaborators to meet and work together in real time.

T1V Story enables organizations to visually tell their brand story. Newly rebooted, T1V will showcase the next generation Story that is simpler and easier to deploy for integrators and their customers. What's more, T1V Story can be paired with ThinkHub to deliver 'wow' experiences for visitors to increase room utilization for teams that need a space to visually collaborate, too.

T1V will be exhibiting in Booth 2V125. The company also has ThinkHub software on display at the GPA Global Lounge in the Europa Suite (between Halls 2 and 3), Planar Booth 3D800, and Displax Booth

3S400. Each of these stands will feature ThinkHub collaboration software running on the latest touch display technology, and highlighting the flexibility of T1V ThinkHub software across different hardware deployments. Whether outfitting a huddle or small meeting space all the way up to an innovation lab or executive briefing center, ThinkHub supports collaborative spaces of all shapes, sizes, and use cases.
