

CORE USE CASE

ThinkHub software powers IT team collaboration in an international expansion.

DATE OF ACTIVATION

February 2019

PROJECT LOCATION

Pune, India

DESCRIPTION

Cognizant is an American multinational corporation that provides IT services, including digital, technology, consulting, and operations services. When the company decided to build its Pune, India facility, it wanted to provide its employees the latest in cutting edge collaboration technology. Incorporating 18 ThinkHubs throughout the campus, Cognizant connects its entire Pune campus and inspires collaboration and creativity between team members.

- (18) ThinkHubs ranging from 55" to 98" single panel displays to multipanel LED video walls
- ThinkHub collaboration software in smaller collaboration areas, huddle spaces and open concept spaces to encourage spontaneous 'single tap to start' collaboration sessions
- Digital whiteboarding, notes, web browser, and grouping tool for content creation and organization
- Interactive Canvas for unlimited content and wireless device sharing
