

## CORE USE CASE

ThinkHub MultiSite unifies Kalnin Ventures' HQ and field office with real-time, room-to-room collaboration.

## DATE OF ACTIVATION

September 2019

## PROJECT LOCATION

Denver, CO

Tunkhannock, PA

## DESCRIPTION

Kalnin Ventures sought to connect its Denver-based headquarters with its operational arm, BKV Operating, located in northwest Pennsylvania. Kalnin needed real-time collaboration between the two locations so that their automated well technology could be monitored from a shared Canvas. A large touchscreen wall powered by ThinkHub MultiSite software now resides at each location providing constant connectivity for the two offices.

- (2) 12 ft, 4x2 ThinkHub MultiSite interactive video touchscreen walls for increased communication and collaboration between locations
- Shared Canvas that features real-time, room-to-room collaboration
- Create and share notes, sketches, and browse web URLs, while also sharing video, image, and PDF files for review
- In-office and remote participants can wirelessly cast BYOD device screens to the interactive Canvas with the T1V App AirConnect to share monitoring dashboards and project reports in real time
