

CORE USE CASE

Powering visual collaboration for a global industrial corporation that designs and builds specialty trucks, military vehicles, aircrafts, firefighting rescue equipment and more...

DATE OF ACTIVATION

November 2019

PROJECT LOCATION

Oshkosh, WI

DESCRIPTION

ThinkHub Multisite was designed as the core collaboration technology for the brand-new headquarters for this industrial innovator. With a focus on security and government contracts, Oshkosh utilizes ThinkHub MultiSite for accounting, engineering and operations, making it their visual collaboration standard for a variety of meetings and high-level projects.

- 70 total ThinkHubs in the building, running on touch displays ranging from 55" - 86"
- ThinkHub MultiSite software enables real time, room-to-room collaboration
- 26 Executive Offices within the building using ThinkHub software for improved collaborative workflow
