

CORE USE CASE

ThinkHub Visualization Lab drives real-time collaboration between researchers, students, and collaborators.

DATE OF ACTIVATION

December 2020

PROJECT LOCATION

Dallas, TX

DESCRIPTION

Southern Methodist University (SMU) recently opened the Gerald J. Ford Hall for Research and Innovation, an interdisciplinary research hub that equips faculty, students and industry partners with tools and resources to collaborate, solve complex problems and power new enterprises in the digital world of today and tomorrow. Within the new state-of-the-art hub, SMU sought a flexible, high-performance solution to power their innovative Visualization Lab for classes, presentations, competitions, events, and more.

- (1) 8x4 ThinkHub interactive touchscreen wall for group collaboration sessions
- Digital whiteboarding, notes, web browser, and grouping tool for content co-creation and collaboration
- Share, collaborate, connect, and present unlimited content to the interactive Canvas with the T1V mobile app for in-room and remote users
- Integrated video conferencing apps to connect students, faculty, staff, and researchers
