DESCRIPTION

Wells Fargo is an American multinational financial services company with corporate headquarters and managerial offices nationwide and overseas. Wells Fargo sought a state-of-the-art collaboration solution to manage their cyber security command centers for real-time threat notification and mitigation.

- (3) 75" ThinkHub touchscreen interactive walls for cyber security management
- Integrated security monitoring tools and training materials in a single location for quick and easy access during potential cyber threats
- Unlimited wireless device and content sharing for proactive security measures and to review and handle incoming threats
- Digital whiteboarding, notes, web browser, and grouping tool for team collaboration during security assessment and problem solving
- Integrated video conferencing for collaboration between command centers and off-site participants
