

T1V Product Release Notes: February 21, 2023

T1V App 5.2

ThinkHub Cloud Groups

With Groups, users can create groups and add individual content assets to those groups. Groups can contain notes, sketches, images, videos, browsers, PDFs, or any other content asset shared to the Canvas. Groups are an effective way to manage and organize Canvas content, and help participants to visualize and categorize content in large team planning and brainstorming sessions.

ThinkHub Cloud Smart Guides

Smart Guides provide visual cues to indicate size, spacing and alignment of objects on the Canvas. Use this tool to visualize content and organize in clean layouts.

ThinkHub Cloud Custom Backgrounds and Gridlines

Customize your ThinkHub Cloud Canvas background color and gridline color.

ThinkHub 5.0

ThinkHub Cloud - Send to Room

ThinkHub 5.0 now supports ThinkHub Cloud Send to Room, where T1V app users can create a ThinkHub Cloud Canvas and send to the ThinkHub Room. Enjoy total persistence from Cloud to Room and invite collaborators whether joining the session remotely or from the room. Simply enter the ThinkHub Room credentials, then select the 'Send' button in your ThinkHub Cloud UI.

ThinkHub Cloud - Canvas Compatibility

T1V continues to deepen compatibility between ThinkHub Cloud and ThinkHub Room. With ThinkHub 5.0, the ThinkHub Room can be invited to a ThinkHub Cloud Canvas, and that Canvas will then be accessible on the ThinkHub Room device at any time.

To update your ThinkHub Room to ThinkHub 5.0, contact T1V Support at support@t1v.com
