ThinkHub Pro II 4k Options and Upgrades

Part No.	Description	MSRP
DOCK SCREEN [Sent via HDMI from ThinkHub to the Dock screen]	ThinkHub is capable of sending one piece of content [Teams call, Agenda, Browser, etc.] to a separate display, usually a smaller non-touch screen, for permanent display until another piece of content is chosen to replace it. Multiple docks are possible and having information persistently displayed can be very powerful for meetings and learning.	€ 975
MULTISITE	Multisite enables ThinkHub rooms located in the same building, or offices in different cities or counties to join together to collaborate with identical information in a single session. What happens in one location is replicated across the multisite call, giving everyone a large touchscreen to work with. If different screen sizes are used, ThinkHub takes care of the resolutions.	Prices available on request.

Part No.	Description	MSRP
HARD LINE INPUTS	The number of directly connected HDMI Inputs to ThinkHub can be increased, allowing for a wide range of camera, TV, computer, and other device feeds UPGRADE: 2 x 1080p HDMI Hardline Connections - 3U Rack UPGRADE: 4 x 1080p HDMI Hardline Connections - 3U Rack	€ 1,890
TOUCH CONTROL	If required, Touch control for HDMI Inputs can be added ▶ Touch control for HDMI Input [1 required for each input]	€ 555
ThinkHub CLOUD.	Create ThinkHub Canvases on your own laptop or MacBook in advance of meetings. ▶ Annual Enterprise license per user.	€ 144
