Integration with Room Control Systems

Upon request, T1V interactive technology can be more deeply integrated with existing room control systems.

PROCESS

We invite our partners to work with their customers to refine which commands they would want/need to integrate in their specific deployment. Then, please provide T1V the list of commands, whereby T1V will execute these commands into your customer's deployment.

COMMANDS

T1V supports receiving requests via HTTP or Telnet.

Below are examples of commands that T1V can implement:

> **Crestron Controllers**
> Video Matrix switcher routing
> DVD players
>
> **AMX Controllers**
> Radio tuner
> DVD players
> Cable box tuners
> Extern Audio switcher
> iPod controller
