ThinkHub

ThinkHub is a visual collaboration tool designed to help you ideate, collaborate, and innovate. By consolidating all the moving pieces of a collaboration session, ThinkHub works with the same devices, content and software that you already use, meaning almost zero setup time to initiate ThinkHub sessions, and more efficient and productive meetings with your peers.

Visit t1v.com/ThinkHub to learn more.

Touch Gestures

ThinkHub is developed to accommodate multiple people doing several things at the same time. If you are used to operating a smartphone or tablet, many of ThinkHub's touch gestures are the same.

Tap

Lightly strike the screen to select content or a link.

Long Tap (Tap and Hold)

Touch the screen, leaving your finger motionless until new information is displayed. This is used to open the Menu.

Flick

Place a finger on the screen and quickly swipe it in the desired direction. Use this gesture to scroll or pan quickly, or to send content across the screen.

Drag

Touch any object on the interactive surface and drag to its desired location. Lift your finger to release the object. This gesture can also be used to pan across the Canvas in a more controlled manner than using a flick gesture.

Pinch-Zoom

To zoom in, place two fingers close together on the screen and move them apart without lifting them from the screen. To zoom out, place fingers a distance apart on the screen and move them together without lifting them from the screen.

Erase

Make a fist with your hand and use the outside of your fist to 'erase' any annotations on content windows or on the Canvas itself.

Idle State

When ThinkHub has not been interacted with for a set amount of time, it will display this screen:

1. T1V App

In the top right corner of the display, you'll see your T1V app credentials. This allows you to connect and display your device screen to the ThinkHub Canvas without having to physically touch the screen.

2. Weather / Date / Time

Here you'll see the daily forecast, date, and time. This can be configured by your ThinkHub administrator (the designated point person within your organization).

3. Calendar

You'll see the meetings scheduled for the room for the day. (This is an optional calendar integration, which your organization may or may not have set up. Your company administrator will need to contact T1V Support to properly add the room's calendar on the ThinkHub device.). Your ThinkHub administrator can dictate how much or how little meeting detail to display (the times, meeting names, meeting descriptions, and meeting hosts are all configurable). You can also scroll up and down to see all meetings scheduled throughout the day.

Once you have your calendar set up on ThinkHub, you can use ThinkHub Scheduling to schedule a future one-time meeting or a future recurring meeting.

USE CASES

High-Traffic Meeting Rooms and Classrooms

If ThinkHub is in a high-demand area, meeting leaders or instructors can use ThinkHub Scheduling to prepare their ThinkHub Canvases in advance. Users will use ThinkHub to create a Canvas and prepare the Canvas with their content. They can then download the Canvas file (.t1vx) to their device, and upload it to the ThinkHub room using the calendar prior to or at the start of their meeting or class.

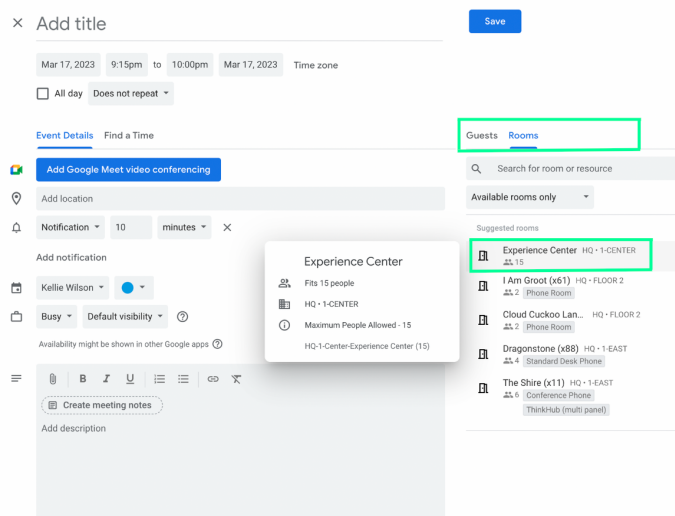

Remote Collaboration

ThinkHub Scheduling allows the same collaboration tool set as an in-room ThinkHub Session without the need to actually be in the room. Users can schedule their ThinkHub Session (see below), invite colleagues to join, and collaborate within the same, shared Canvas. ThinkHub Sessions can be saved and resumed anytime.

SCHEDULING A THINKHUB MEETING

ThinkHub Scheduling allows you to schedule a future one-time or a future recurring ThinkHub meeting on your ThinkHub device.

- On your personal computer, open your calendar application (Microsoft Exchange, Google Calendar, iCloud) and create a new calendar event
- Invite all participants that will need to access the ThinkHub device during the meeting
- Locate the room (device) name and add it to the invite list
- Specify your T1V Canvas in the calendar description (optional)
- ◆ Session: “file name” (case sensitive)
- Save the meeting invite

Once scheduled, you'll see the meeting on the ThinkHub idle screen on the meeting's scheduled date as well as in your usual calendar application. All meeting participants will receive an automatic email notification five minutes prior to the meeting start time, or if a user manually initiates the meeting from the idle screen by pressing the Join Meeting button.

The email will contain a link to launch the T1V application which allows users to remotely connect to the scheduled meeting. Once you receive the link, simply click on it to remotely join the meeting via T1V.

If you're using T1V, once a meeting has been scheduled, you'll see the meeting appear within the T1V Meetings Tab. The 'Join' meeting button becomes active five minutes prior to the start of a meeting. Or, if the meeting is initiated manually from the ThinkHub idle screen, the 'Join' button will become active and you will also receive an email that contains the Room ID link.

If there is an active session on ThinkHub within five minutes of a scheduled meeting, ThinkHub users will be presented with the option to either accept the upcoming meeting, delay the upcoming meeting, or dismiss the upcoming meeting so that the current meeting can continue without interruption.

If you choose to accept the meeting, the current session will end and the new scheduled meeting will begin while preserving the content on the canvas. All T1V app users will be disconnected. If you choose to delay the upcoming meeting, the current meeting will continue. The same prompt will then display one minute prior to the next scheduled meeting. If you choose to dismiss the meeting, the current meeting will continue without further interruption. The next scheduled meeting can then be initiated from

the idle screen or the menu calendar. (Note: This feature is only available if the optional calendar integration is set up on your ThinkHub).

4. Whiteboard

Select 'Whiteboard' to launch the ThinkHub Canvas and immediately open a large Whiteboard. Use this feature to start Whiteboarding right away.

5. Start

Tap 'Start' to launch your ThinkHub Session.

Custom ThinkHub Start Button

Contact T1V to add a customized button to your ThinkHub, which will launch a specified session.

Canvas and Canvas Map

The ThinkHub Canvas is the digital backdrop for your ThinkHub sessions, and can expand up to 20 times the surface area of the physical touchscreen. Use touch gestures to navigate the Canvas.

The Canvas Map is located in the upper right corner of your ThinkHub Canvas. The active area of the Canvas is the visible piece that is displayed on the touchscreen, and is represented by the light shaded box. This can aid you in finding particular pieces of content, or panning from one area of the Canvas to another. In addition to using the Canvas Map as your visual aid, you can tap directly on the Canvas Map to quickly navigate to areas of the Canvas.

Canvas Toolbar

Your Canvas toolbar lives at the bottom of the ThinkHub Canvas and holds all of your key Canvas tools. From the Canvas toolbar, you can access apps, media, menu, and devices.

Minimize

The ThinkHub Canvas Toolbar can be hidden to maximize the user's active workspace. Tap the blue arrow at the top of the menu icon to hide the Canvas Toolbar, Canvas Map, and T1V app credentials.

Apps

To help you get ideas and thoughts onto the Canvas quickly, we've built in several apps: Web Browser, Note, Whiteboard, and Group. You can access all four of these apps from the bottom corners of the Canvas. You can also access the apps in the menu.

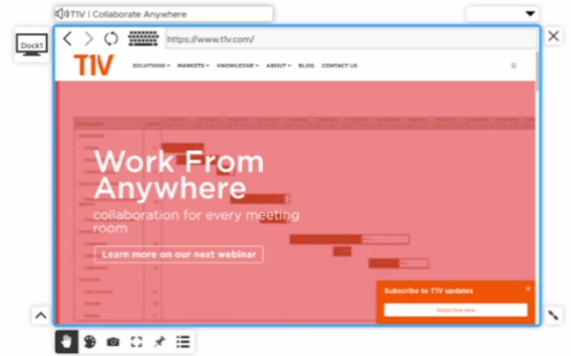

Simply tap or drag/drop the icons to the Canvas to open a new Web Browser, Note, or Whiteboard. Tap once inside the window to make it active (you'll know the window is active when the color border appears and you can see your content toolbar at the bottom of the window). When active, you can pinch-zoom within the content window to focus on a particular area.

To make the window inactive, simply tap the collapse toolbar button () on the bottom left of your content toolbar. You'll now be able to drag the content wherever you please.

To remove a Web Browser, Note, or Whiteboard window from the Canvas altogether, tap the 'X' button in the top right corner of the content window.

Tap on the browser search bar to open the keyboard to enter your search query, or tap on the top URL bar to go directly to a web page. Simply tap anywhere on the Web Browser window to activate your content window. Once the window is active (you'll know this when the color border appears and you can see your content toolbar) you can pinch- zoom within the content window. The default URL for new Web Browser windows is Google.com.

Tap anywhere on the Note window to activate your content window. Once the window is active (you'll know this when the color border appears and you can see your content tools) you can pinch-zoom within the content window. You can also resize the dimensions of the Note using the two-arrow icon on the bottom right of the window. In addition to the standard content tools, you can change the background and text colors using the button in the top left corner of your Note content window.

Whiteboards are designed to draw freehand or with a stylus. Tap anywhere on the Whiteboard window to activate your content window. Once the window is active (you'll know this when the color border appears and you can see your content tools) you can pinch-zoom within the content window. You can also resize the dimensions of the Whiteboard using the two-arrow icon on the bottom right of the window.

With ThinkHub Groups, users can create groups and add individual content assets to those groups. Groups can contain notes, whiteboards, images, videos, PDFs, or any other content asset shared to the Canvas. Once a group is created, users have the ability to assign a theme (background and text color), and can control the way the group content is displayed (spacing between assets, alignment, and more...). ThinkHub Groups are an effective way to manage and organize Canvas content, and help participants to visualize and categorize content in large team planning and brainstorming sessions.

1. Number of Items in a Group

The number next to the Group name indicates how many items are within that group.

2. Group Name

The Group header gives you the ability to edit the Group name. Simply tap anywhere within the Group header text to put the Group header in edit mode.

3. Info

Tap this button to display the Group info card. The info card allows you to put a more detailed description of the Group and/or the Group contents.

4. Arrange

Tap this button to display different Group arrangement and layout options.

5. Advanced

Tap this button to display different Group behavior. For example, you can select and apply a different application background and text color for all the Group contents.

6. Hide Content

Tap this button to hide or minimize the Group contents on the Canvas.

7. Close Group

Tap this button to close or delete the Group. Note: The Group contents will remain on the canvas and retain the group attributes (if applicable), but will no longer be grouped together.

8. Adding Items to a Group

To add an item to a group, drag the item close to the group. A light blue border and “Add to..” text will appear around the group.

Release the item and it will automatically be added to the group.

You can also add content to a group by selecting the content and using the drop-down group selecting tool in the upper right corner.

9. Removing Items from a Group

To remove an item from a group, drag an item away from the group until an orange border and “Remove from” text appears around the group.

Add content to group

Remove content from group

Media

All media files live within the media section of the Canvas toolbar. This includes images, videos, and PDFs. To load your files to the media section, simply plug in a USB drive to your ThinkHub USB port. For larger ThinkHub solutions (multipanel displays), this is likely a USB port installed near the interactive wall. For smaller ThinkHub solutions (single panel displays), this may be located on the back or side of the interactive display. Ask your ThinkHub administrator for more details on where your USB port is placed. Your ThinkHub may be integrated with your network drive folders, in which case no USB is required to access your media.

Once you've plugged in your USB drive, your content will automatically load into the media section with thumbnail preview windows. The file name will appear as overlay text on the base of the thumbnail preview image as an additional reference point. You can drag or flick through media to find the content you would like to share to the Canvas. To share the content to the Canvas, simply tap or drag file thumbnails.

If you've entered a media folder, the home button () will take you back to the top level of your USB or network drive. Hit the back button to move in and out of file folders.

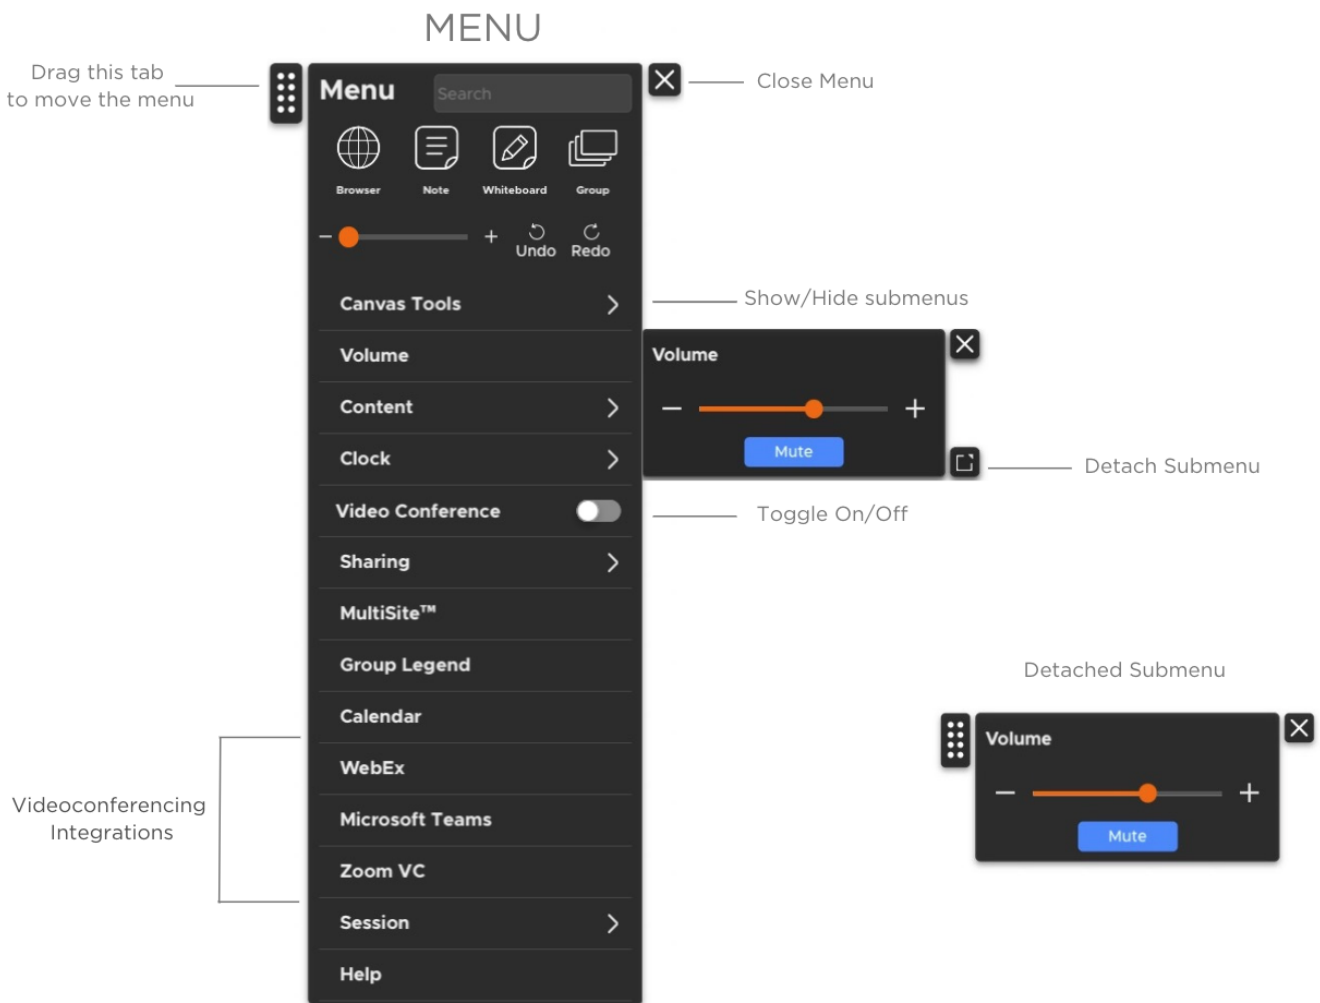

Menu

To open the menu from the Canvas toolbar, just tap the T1V icon to launch. You can also long tap (tap and hold) anywhere on the Canvas to open the menu. Multiple users can open the menu at the same time. If the menu goes idle after a set period of time, it will disappear from the Canvas.

The menu is broken into a series of tabs and submenus. All submenus can be detached by touching the pop-out icon in the bottom right of the submenu. This will detach the submenu from the menu, and will remain persistent on your Canvas. Use the submenu tab in the top left corner to drag and place the submenu anywhere on the Canvas.

1. Menu Search

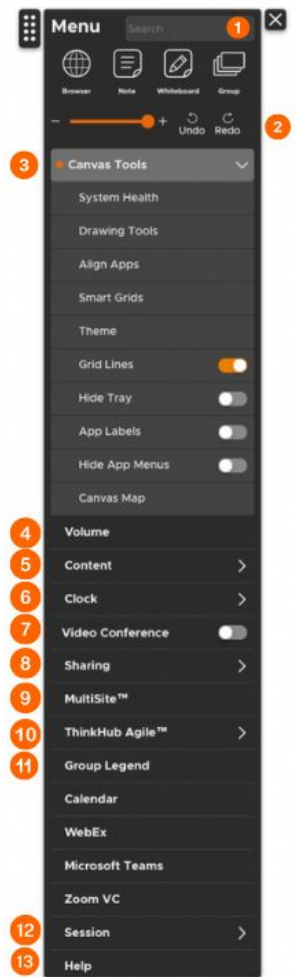

The Menu Search feature allows you to quickly search for applications, content etc. within the Menu. When you start typing, the Search feature will return all the results that include the text entered. The Menu Search also has a built in calculator, so you can quickly enter in simple formulas and see the results.

2. Undo/Redo

Select 'Undo' to undo the last action on the Canvas (annotation, opening content, aligning content, etc.). 'Redo' restores actions removed by 'Undo.'

3. Canvas Tools

Select this tab for all Canvas controls. Here you can view multiple submenus, including Drawing Tools, Align Apps, Theme, Grid Lines, App Labels, Canvas Map, and Clear Canvas.

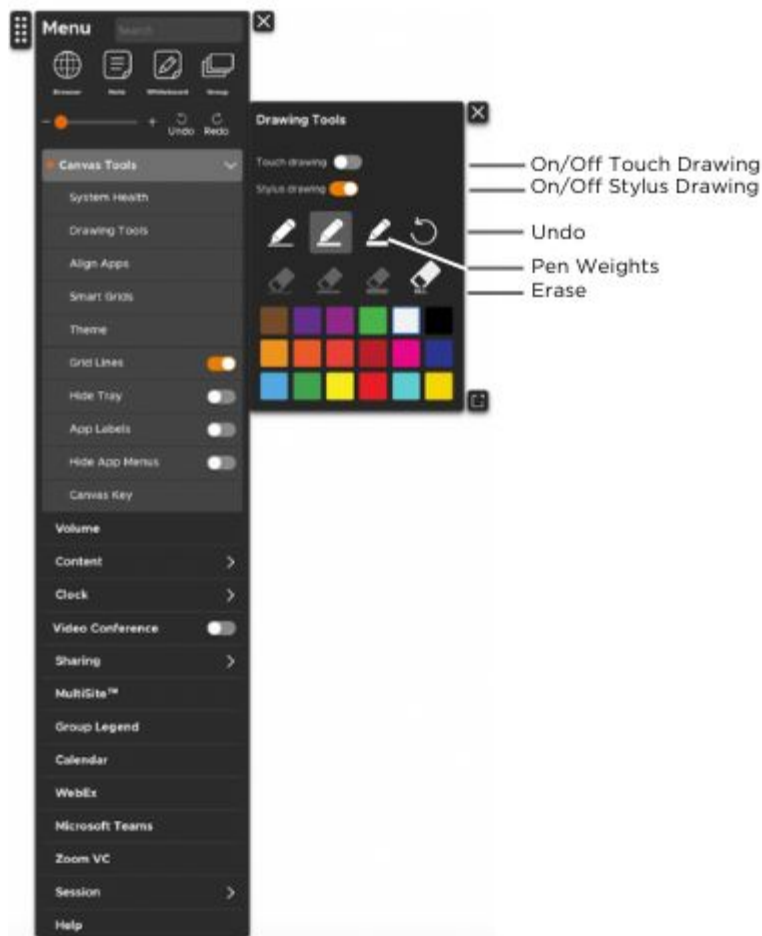

Drawing Tools

From the Drawing Tools submenu, you can control how drawings will appear on the Canvas. Start by toggling on touch drawing to enable users to draw on the Canvas using finger touch. If your display supports Stylus drawing, you will have the option to toggle Stylus Mode on, enabling you to draw on the Canvas using a Stylus.

Once Canvas drawing is enabled, you can select pen weight and color at the same time. You can also undo your last action, select eraser weights if you want to erase specific content, or erase all (this will erase all Canvas drawing). Please note, you can undo the erase all action by tapping the same button once highlighted.

When using Canvas drawing tools, you will only be able to select one pen/eraser/color at a time, however the Drawing Tools menu will remain active until you close it. Multiple people will be able to draw (or erase) at the same time, but once the drawing tool is selected for Canvas drawing, those selections will apply to the entire Canvas.

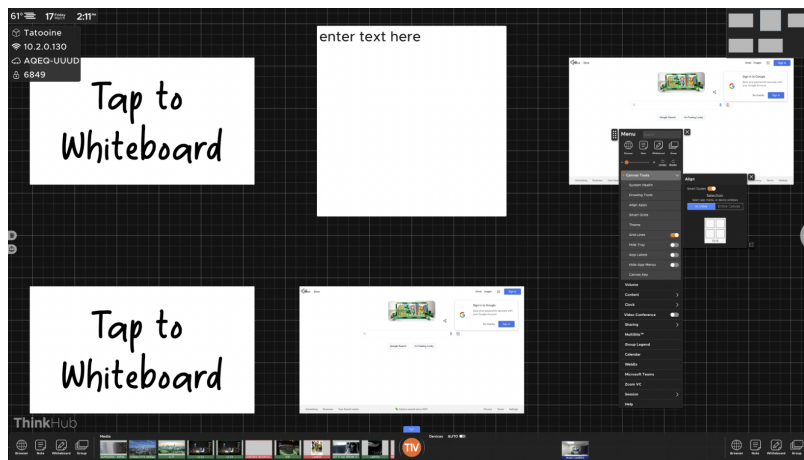

Stylus Mode

When used with compatible touch sensor hardware, ThinkHub can immediately distinguish between a finger touch and a stylus touch. With your finger, you can move objects around the Canvas. With a stylus, you can write and annotate on the Canvas. Because ThinkHub recognizes the difference between these two touch events, you can more quickly operate between these two actions. You can also erase annotations by creating a fist with your hand, and moving the backside of your fist in a circular motion to erase writing on the interactive Canvas. This is a tool you can toggle on/off.

Align Apps and Smart Guides

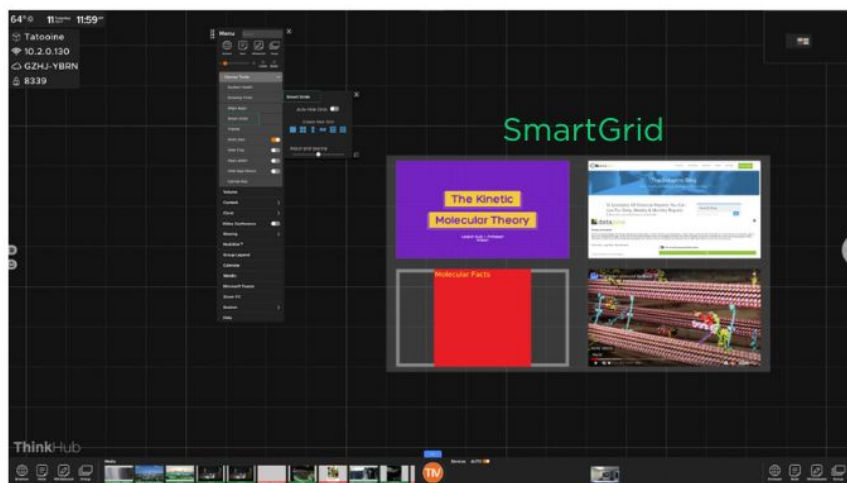

Use this tool to align the content on the ThinkHub Canvas. You can align all items 'In View' (what's currently displayed on the physical display), or the 'Entire Canvas.' This feature will quickly snap all items to grid.

Use the ThinkHub Smart Guides™ tool to enhance the alignment capabilities within ThinkHub. Smart Guides provide visual cues to indicate size, height, and spacing alignment of apps on the Canvas.

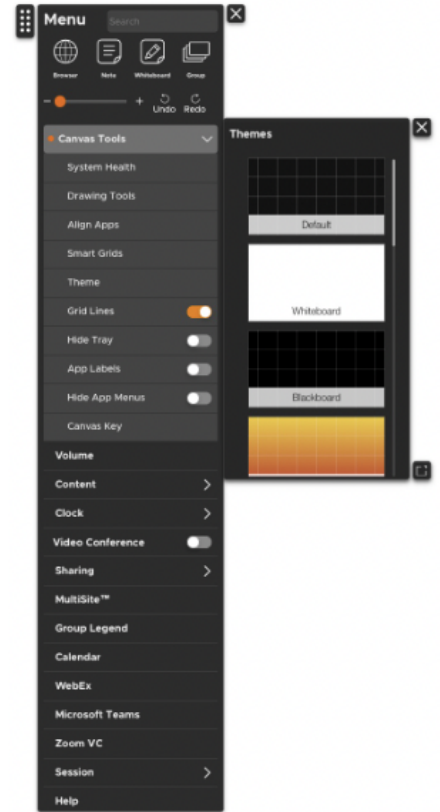

Smart Grids

Use SmartGrids to create Canvas layouts to view and present content in optimal sizing and alignment. Once the content is dragged into the SmartGrid drop zone, the content will expand to the max size of the grid. SmartGrids is part of the ThinkHub alignment tool set, designed to aid users in better organizing and visualizing content on the ThinkHub Canvas. Plus, it makes for a powerful presentation tool when utilizing ThinkHub or any variation of ThinkHub, like ThinkHub xCanvas, to present highly visual content to teams.

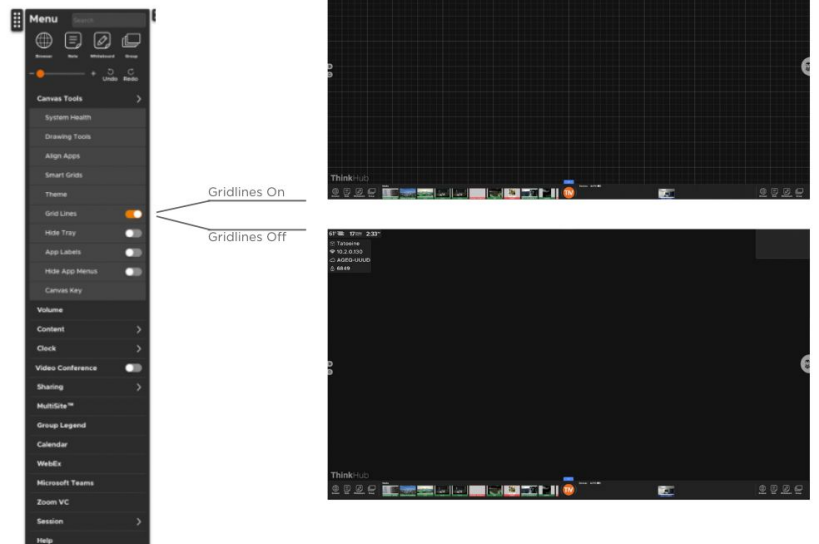

Theme

Use this tool to switch the background theme of your Canvas. There are multiple options to choose from, which you can view by scrolling up and down. All content will remain the same on the Canvas; this will simply change the theme palette.

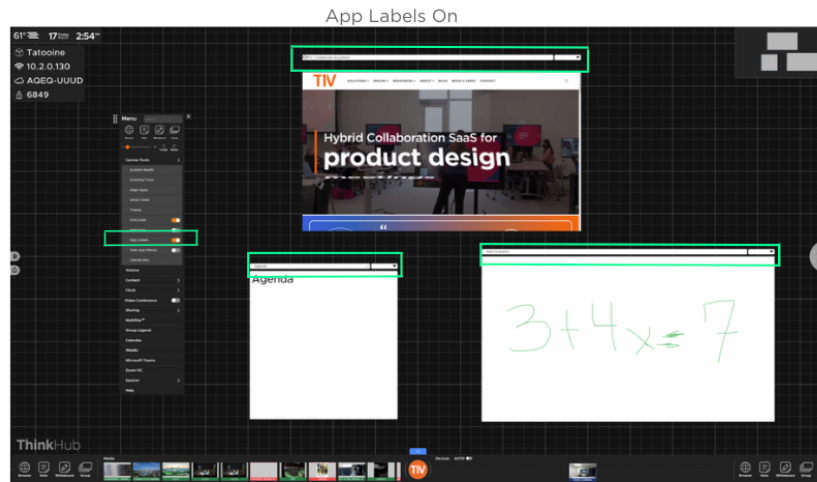

Show Grid Lines

ThinkHub gives you the option to toggle your grid lines on or off. Access this feature in the Canvas submenu of the ThinkHub menu.

Show App Labels

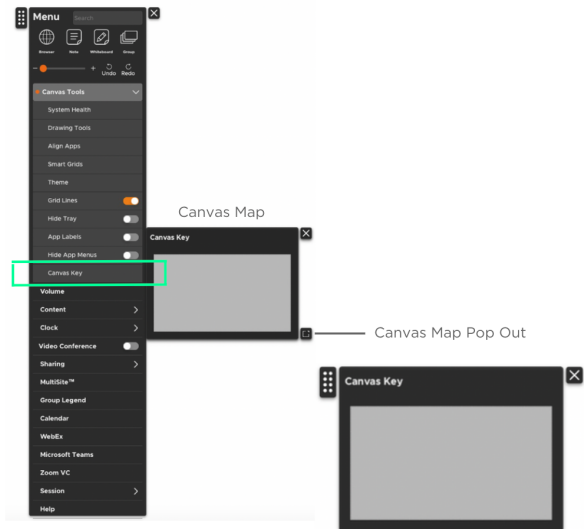

This is a tool you can toggle on/off. When on, app labels will appear in the top left border of all content windows. These are designed to help you distinguish between different pieces of content displayed on the Canvas. You can change the name of the app label anytime by tapping on the label's text. A keyboard will appear and you can rename the content directly on ThinkHub.

Canvas Map

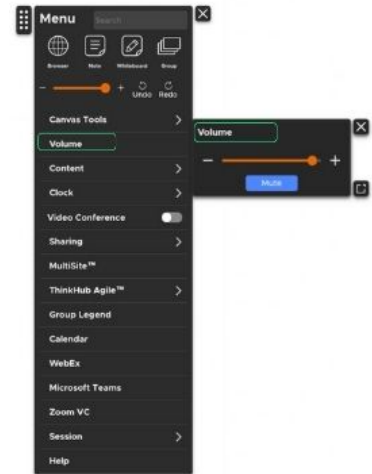

Access the Canvas Map from the convenience of the menu - particularly useful for large, multipanel walls or any ADA deployments.

You can quickly move to a different area of the canvas by tapping on the Canvas Map.

4. Volume

Select this tab to control the volume of media and content playing on your ThinkHub Canvas. This button appears only when using an analog audio output, like speakers (not HDMI).

5. Content

Select this tab to access all Canvas content. Here you can view multiple submenus, including Media, T1V app, and Devices.

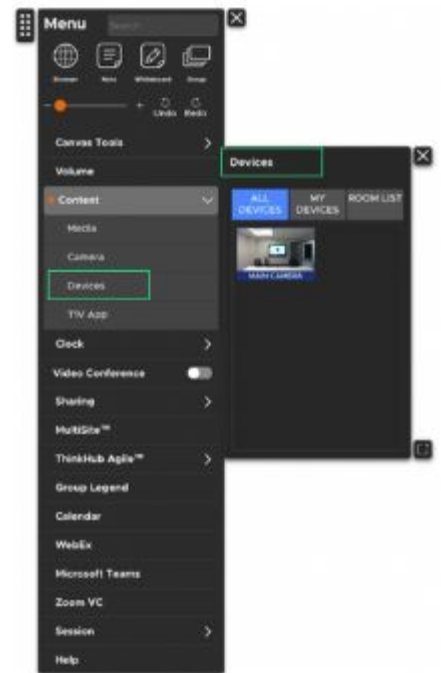

Media

Select this tab to access your media files. These will also live in the media section of the Canvas Toolbar. Here in the menu, you can use your detachable submenu to relocate the media anywhere on the Canvas. If you are working on a large wall, or multiple people want to access media at the same time, each person can operate from their own media submenu.

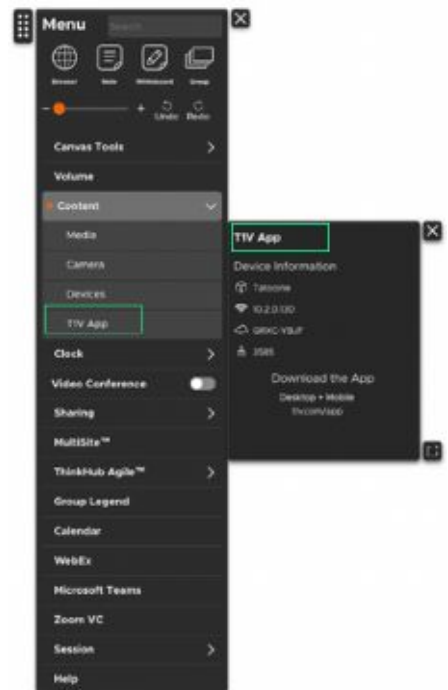

Devices

Select this tab to access devices connected through T1V app (laptops, smartphones, tablets, etc.). To view specific devices, you can tap or drag them directly to the Canvas.

T1V App

Select this tab to access your T1V app information, along with instructions on where to download the latest T1V app (free to all ThinkHub users). These details live persistently in the top right of the Canvas, but now you can detach your T1V app submenu and place wherever is most visible to users in the room (particularly useful to those with large, multipanel wall deployments).

6. ThinkHub Clock

The ThinkHub Clock features three main capabilities: Timer, Alarm, and Countdown. Use these applications to get more done while managing effective meetings and brainstorming sessions. You can also leverage the clock tool for design and sprint planning or lean innovation.

Timer

From the ThinkHub Clock submenu, select the Timer option to run effective meetings and brainstorming sessions.

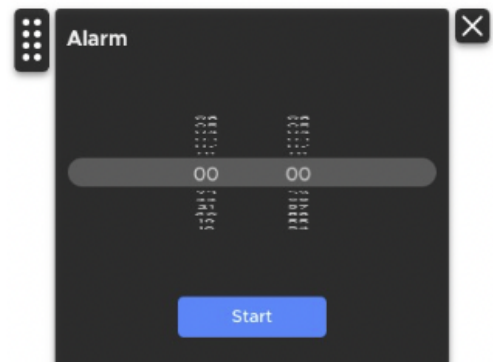

Stopwatch

From the ThinkHub Clock submenu, select the Stopwatch option to measure and track time intervals on the canvas.

Alarm

From the ThinkHub Clock submenu, select the Alarm option to set a visual alarm on the canvas.

7. Videoconferencing

ThinkHub's Video conferencing is designed to work with the systems you already have in place. ThinkHub VC options include Webex, MS Teams, Google Meet, and Zoom.

Webex

Select this tab to join an existing Webex call or create a new one entirely.

Remote participants will be able to view the ThinkHub Canvas, while you will be able to view remote participants' screen and/or camera feed. When Webex is selected from the menu, the Webex window is displayed on the Canvas and in the VC Panel to the right.

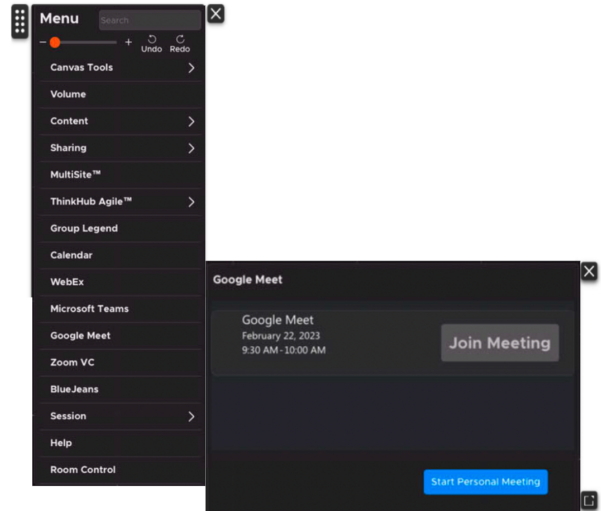

Microsoft Teams

Select this tab to join an existing MS Teams call or create a new one entirely. Remote participants will be able to view the ThinkHub Canvas, while you will be able to view remote participants' screen and/or camera Feed. When Teams is selected from the menu, the Teams window is displayed on the Canvas and in the VC Panel to the right.

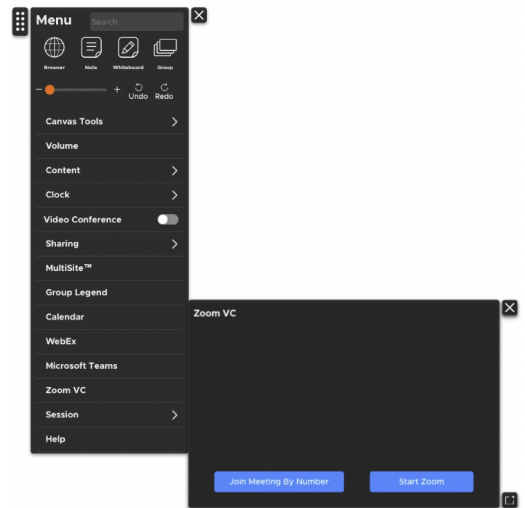

Google Meet

Select this tab to join an existing Google Meet call or create a new one entirely. Remote participants will be able to view the ThinkHub Canvas, while you will be able to view remote participants' screen and/or camera Feed. When Google Meet is selected from the menu, the Google Meet window is displayed on the Canvas and in the VC Panel to the right.

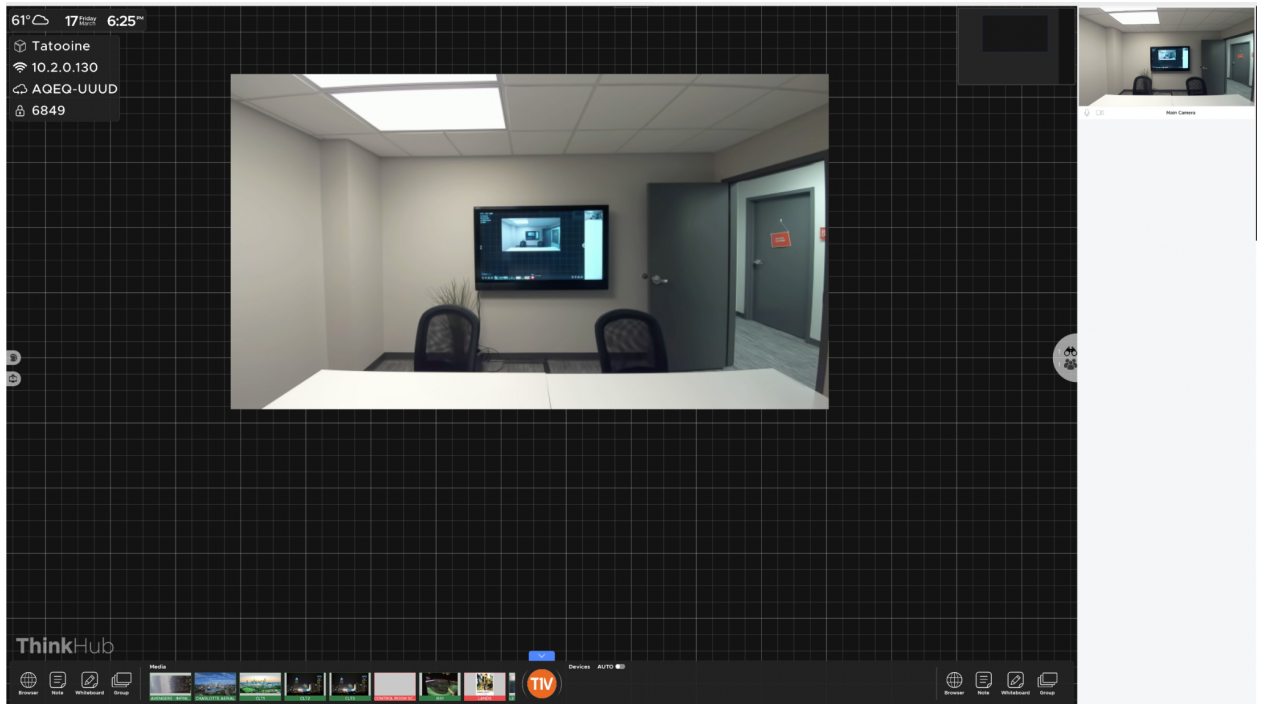

Zoom

Select this tab to join an existing Zoom call or create a new one entirely. Remote participants will be able to view the ThinkHub Canvas, while you will be able to view remote participants' screen and/or camera feed. When Zoom is selected from the menu, the Zoom window is displayed on the Canvas and in the VC Panel to the right.

VC Panel

The ThinkHub VC Panel can now be used to maximize your active workspace while running a 3rd party VC application. Accessible through the Menu, you can toggle this feature on and off. When launching your video conferencing app, the application will appear in a panel to the right of the viewable canvas. You can then drag and drop or tap the VC application windows onto the Canvas. The VC application windows will remain persistent in the VC panel, so if one of the VC application windows is closed while on the Canvas, you will still be able to access the VC windows in the VC panel.

8. Sharing

Select this tab to view your sharing options for the Canvas. In this example, you can choose to email or print your Canvas.

Email

In this submenu, you'll be prompted to enter the email recipient(s), subject, and message. You can also select whether you'd like to email the entire Canvas or just the visible Canvas (what's currently in view on the touchscreen display). Tap 'Send' when you have completed all of these fields. The recipients will receive a PDF copy of your Canvas session.

9. MultiSite

Select this tab to access ThinkHub MultiSite. (Please note: ThinkHub MultiSite is not a standard feature and must be purchased as a ThinkHub Add-on.)

With ThinkHub MultiSite and ThinkHub Multisite SMB, you can join an existing Session (select any Sessions that appear in the 'Join a Session' section) or begin a new MultiSite Session.

To begin a new Session, enter the Session name and your optional password. If you password-protect your Session, you'll need to share that password with all remote MultiSite participants to join your Session. Tap 'Begin' to launch your MultiSite Session.

MultiSite Sync

ThinkHub MultiSite Sync is another feature developed for our MultiSite customer base, enabling sites to 'lead' MultiSite sessions by inviting other locations to sync with their current view. This ensures that all MultiSite locations - up to 10 at a time - can view and operate within the exact same area of the Canvas at the same time. Locations can switch who is the lead throughout the MultiSite session, and each location has the ability to control who is 'Synced' and who is not.

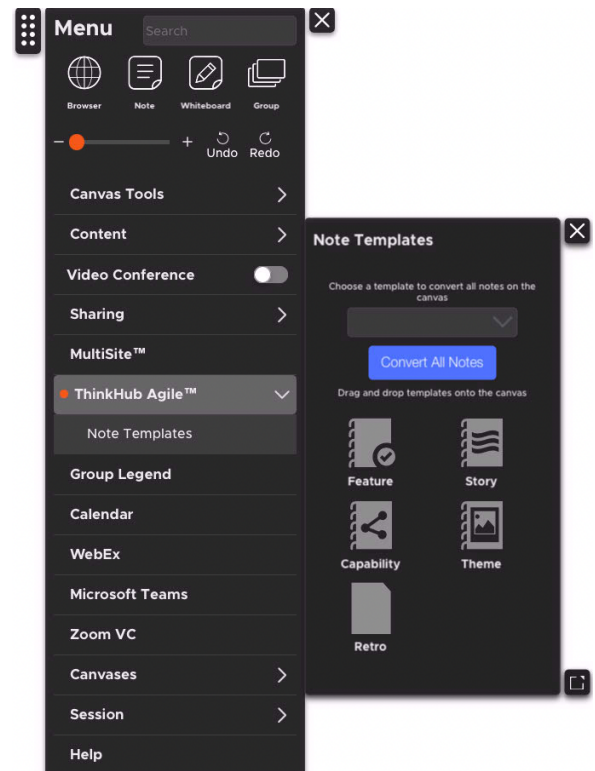

MultiSite Room Merging

ThinkHub MultiSite now gives you the option to access any participant's devices from any ThinkHub. Shared devices include Hardline Inputs, T1V casted feeds, and cameras.

10. ThinkHub Agile - Templates

Agile customers have the option to use T1V's standard Agile templates, which include Feature, Story, Capability, Retrospective, and Theme, or to work with T1V to 'design-your-own' Agile templates to adhere to your team's own workflow.

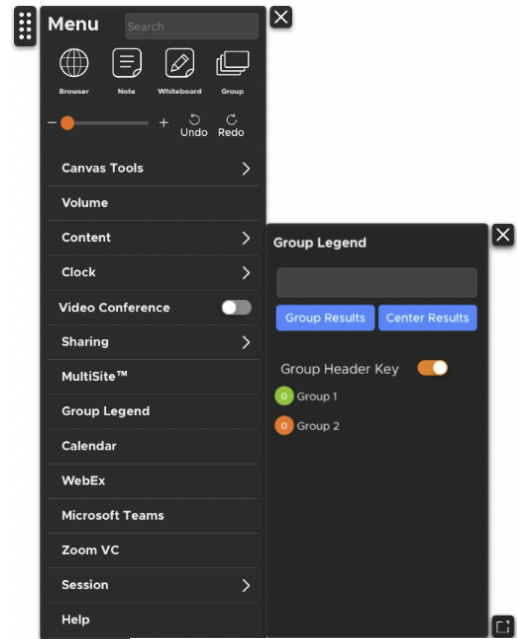

All Agile templates can integrate directly with Agile system of record software like CA Rally or JIRA. ThinkHub Agile users can upload/download CSV data files between their system of record software and ThinkHub, removing the need for someone to manually capture and update this information in two places.

11. Group Legend

Select this tab to access the Group Legend. With the Group Legend you can easily keep track of how many Groups are on the canvas, how many applications are in each Group, and what color the Group header has.

You can also search for specific text within notes that are in Groups and either center those results or create a new Group with the notes that contain the searched upon text.

12. Session

From this tab you can open, save, and end your ThinkHub session.

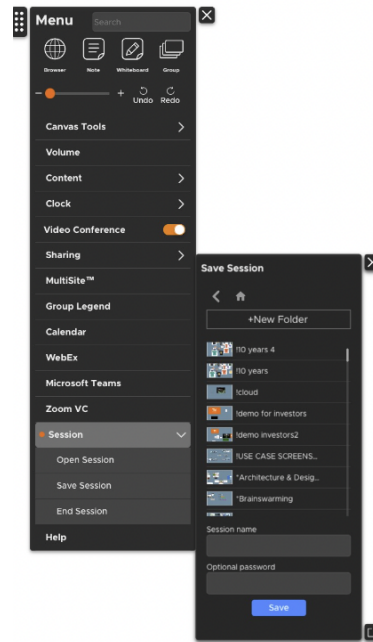

Open Session

Here you'll see a list of all saved Sessions available to you. These are presented in alphabetic order, and offer a thumbnail preview of the Canvas for reference. Tap the Session you want to open. You'll be prompted for a password if the Session is password-protected. Finally, tap 'Open' to open the selected Session.

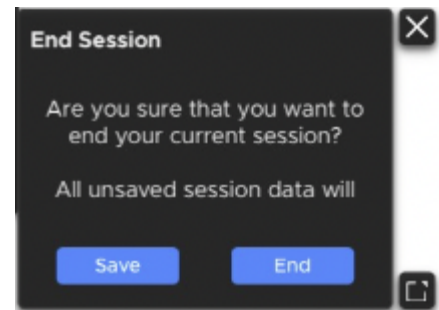

Save Session

Here you can save your Session. You'll be able to view all saved Sessions so that you can be sure not to create a duplicate name for your Session. You can also enter a password if you want to password protect your Session. Tap 'Save' when you are ready to save your Session.

End Session

Here you can choose to end your Session. Please note, all unsaved session data will be deleted. Tap 'End Session' to end the session without saving any data.

13. Help

Anytime you need a quick refresher on your ThinkHub tools, you can access ThinkHub Help right here at the bottom of the menu. Tap 'Continue Session' to return to your session.

Devices

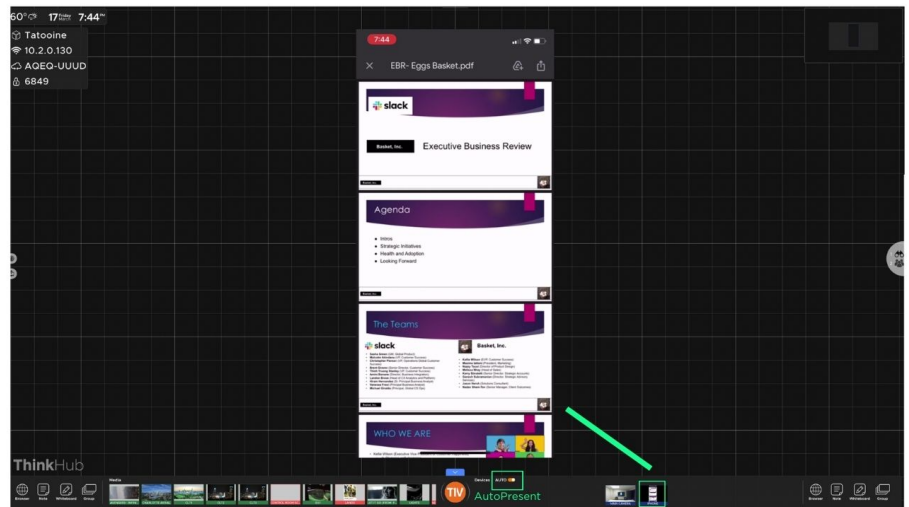

All connected devices will appear in the devices section of the Canvas Toolbar. Each device will display as a preview thumbnail until you tap or drag the thumbnail to share to the Canvas. At the base of the preview thumbnail, the name of the device displays as overlay text for additional reference.

Devices

AutoPresent Mode

You also have the option to enter AutoPresent Mode. You can toggle 'On / Off' to automatically display device screens to the Canvas when connected. This is helpful when giving presentations or when you don't want to rely on someone to drag connected devices to the Canvas. When AutoPresent is on, anyone who connects to the Canvas will automatically be pushed to the Canvas for quick presentation.

*Device windows appear front and center in AutoPresent Mode

Content Tools

Each piece of content available to you on the ThinkHub Canvas comes with its own set of user tools. The content tools are the same for all types of content, so no matter if you've opened a Note, Whiteboard, PDF, video, or image, your tools will be consistent and hold the same user tools.

To activate your content tools, tap inside the content window. You will see content tools appear, always anchored to the bottom left corner of the content window. While your content tools are open, you can not flick or drag/drop content windows. To close the content tools, tap the collapse button on the bottom left of the window.

ThinkHub xCanvas

ThinkHub xCanvas extends the ThinkHub experience beyond a single display to multiple displays throughout a room. For a more immersive experience, create an xCanvas that spans all four walls of your meeting room. Use the xCanvas to visualize and manipulate large amounts of data and content with your team. Toss content across the room from one display to another with touch gestures or via the T1V app Access controls (available to in-room and remote participants on their mobile device).

Please note: this is an add-on feature to standard ThinkHub. Please contact your T1V Sales Rep for additional details on pricing.

Key Features Include:

Easily toss items across the room. Use touch gestures to 'toss' content from one display to another, or use T1V app to control placement of content assets.

Snap grids. Snap Grids can support four areas per display in a 2x2 grid format. Once a content asset is dropped in the designated drop zone, the asset will snap into place at largest size and resolution. If user takes another item

and places it in that same zone, the new asset will display on top of it. Snap grids are currently a default setting - the user must specify whether they want snap grids or not at time of configuration.

Full screen mode. Tap on any asset to view in full screen mode in its current display. (Full screen mode will not extend across the entire xCanvas.)

Separate Canvas toolbars. For each display, you can separate Canvas toolbars to access all ThinkHub functionality no matter which screen you're on.

Use T1V app to also control and move content. This functions as a remote control whether you're in the room or operating remotely. Also use T1V app to send notes, URLs, and files to the xCanvas. To send files to a specific area of the xCanvas, simply drag and drop over your target area.

The xCanvas can support up to 12 1080p displays or up to three 4K displays. All displays must be uniform in size and resolution. Displays can be touch or non-touch. Non-touch displays must be controlled solely via T1V app.

What is the T1V app?

The T1V app powers hybrid collaboration. Whether connecting to a ThinkHub Room, or building ThinkHub Cloud Canvases from your laptop - T1V app is a total collaboration tool for you and your hybrid teams. The T1V app is a free download that supports macOS, Windows, iOS, and Android.

To install T1V on your device, visit t1v.com/app.

Dashboard

The App Dashboard serves as a daily digest of activity.

In Progress | displays current meetings that are live and currently in session

Upcoming | highlights scheduled meetings for the day

Notifications | all app-related communications and activity will be recorded in this section

Pro Tips | stay up to date on new and 'pro' features

In the Dashboard, you also have access to navigation on the left column, where you can see:

T1V app logo | touch this to return to your dashboard home view

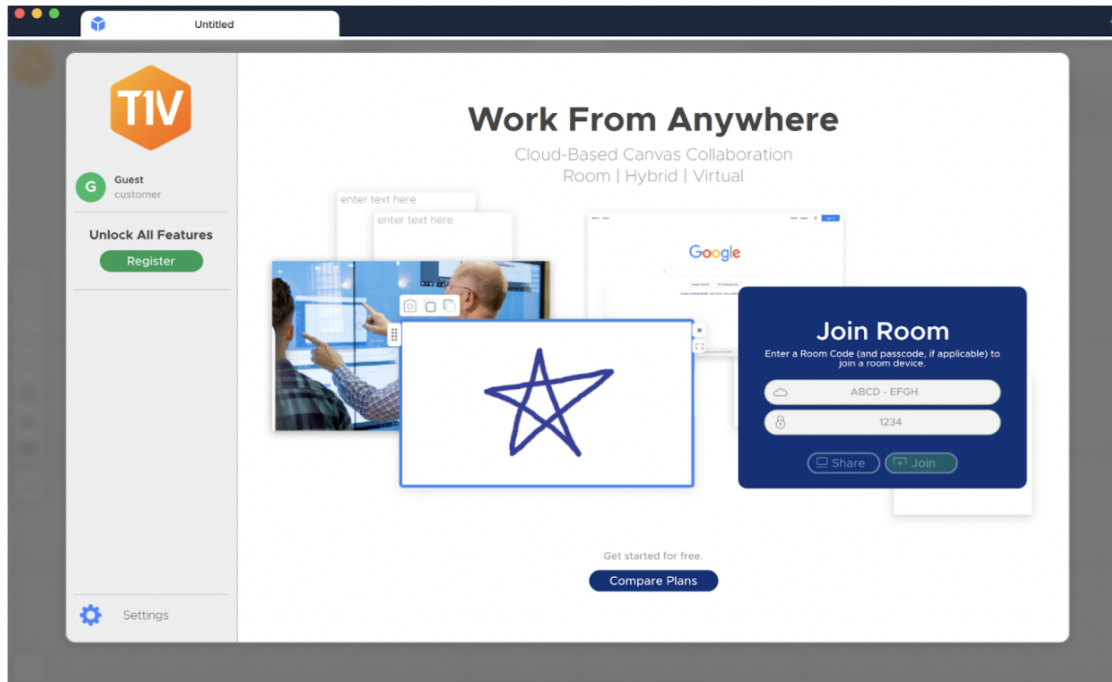

User ID | to change this, go to your settings in the bottom left

Search Bar | search your Canvases, Meetings, and recently connected devices

The 'In Progress' section will display current meetings that are live in session. 'Upcoming' will highlight your scheduled meetings for the day. All app notifications will display within the 'Notifications' section. Stay up to date with new features and functionality by reading the Pro Tips section. Search All of your Canvases, Meetings, and Recently Connected devices. When you start typing, the Search feature will return all the results that include the text entered.

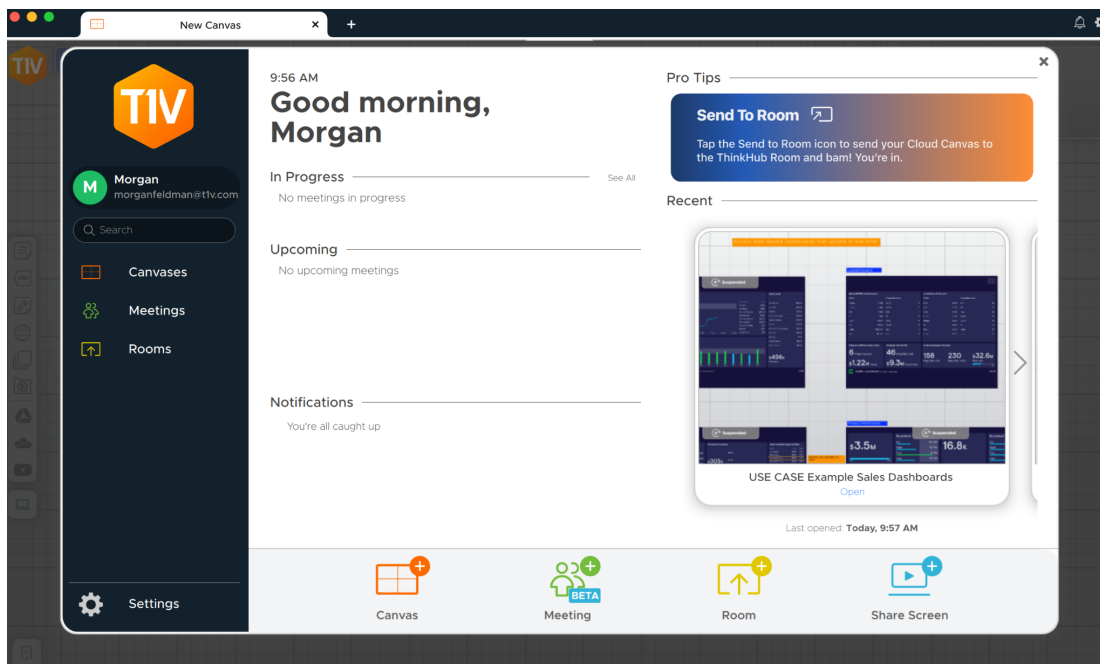

T1V Dashboard — Unregistered View

When you first download the T1V app, this is your default view. From here, you can join a ThinkHub or T1V Hub room. Register to unlock additional features, like [ThinkHub Cloud](#).

T1V Registered View

Once you register your T1V app and verify your email address, your T1V dashboard will update to this view.

Join Room

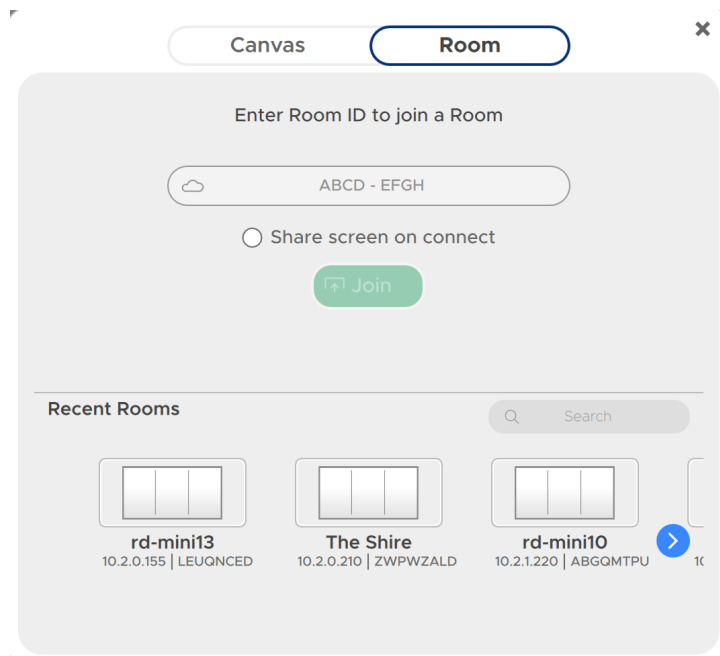

Once you have installed the T1V app on your device, select 'Room' to connect to a ThinkHub Room or T1V Hub.

Enter the T1V Room ID -reference the top left corner of the room display for this information.

ThinkHub Credentials

Note: T1V users can connect to a T1V device from anywhere in the world, even from a cellular network connection.

Once you have connected to a T1V room display, that device will automatically appear in your 'Rooms' list - this allows you to quickly connect to future sessions (note: you must use the IP Address for the Hub to remember your 'Rooms' list). After your first connection, all you will need to enter to join that same display will be the Room PIN (the 4 digit passcode).

As an additional layer of security, the passcode is located in the upper left corner of the Canvas and is required to connect devices to the display via the T1V app. Your administrator can specify a static passcode, or request the passcode to reset automatically every 30 minutes. You may also request installations where no passcode is required.

Joining a Scheduled Meeting

ThinkHub Scheduling allows you to schedule meetings with your ThinkHub or Hub room. Once a meeting has been scheduled, you'll see the meeting appear within your meetings tab, found on the left column of the app. The 'Join' meeting button becomes active five minutes prior to the start of a meeting. Or, if the meeting is initiated manually from the ThinkHub idle screen, the 'Join' button will become active and you will also receive an email that contains the link to join via the T1V app.

Note: The calendar and scheduling features must both be enabled on the ThinkHub device for meetings to display in the Meetings tab within your T1V app. More information on ThinkHub Scheduling can be found here: [ThinkHub Scheduling](#).

The screenshot displays the T1V Meetings interface. On the left is a dark sidebar with the T1V logo, user profile for Tanya Test (tcherevan@t1v.com), a search bar, and navigation buttons for Canvases, Meetings (selected), and Rooms. At the bottom of the sidebar is a Settings button. The main area features a top navigation bar with icons for Canvas, Meeting (labeled BETA), Room, and Share Screen. Below this is a 'Meetings' section with a grid of eight meeting cards:

Meeting Title	Room ID	Date	Time
Standup	t1v-techjk		9:45 AM
QA daily meeting	qa-stud1		3:25 PM
Standup	t1v-techafm	4 July 2023	9:45 AM
Weekly Support Meeting	rd-m2mini	11 July 2023	1:00 PM
Developer Meet	t1v-techjk		2:00 PM
Standup	t1v-techafm	3 July 2023	9:45 AM
Release Review	t1v-th-1028	5 July 2023	4:00 PM
Release Review	t1v-th-1028	12 July 2023	4:00 PM

The T1V app Menu

The Menu is located on the left column of your T1V app. In the Menu, you'll find a series of tools that enable you to interact with the ThinkHub Room- including anything from sending notes, URLs, and files, to downloading assets from the Canvas. Here is a detailed breakdown of what you can do from your T1V app Menu:

Send Note

Create a note from the convenience of your device by typing your note into the text field with your own keyboard. Select 'Send Note' to send your Note to the ThinkHub Canvas. Select the note icon to start a new note. Once shared to the Canvas, in-room participants can also edit your Notes - opting to change background colors to categorize ideas, changing the actual copy, or annotating on top of the Note. If there are one or more Groups on the Canvas, the 'Select Group...' dropdown appears in the top right of the Send Note window. Selecting a Group within this dropdown will automatically add the Note to that Group when sent to the Canvas.

Send URLs

Enter a URL to send to the ThinkHub Canvas. ThinkHub will then launch a Web Browser window with that URL. (To paste a URL from your laptop web browser, copy & paste the URL using the appropriate keyboard shortcuts.)

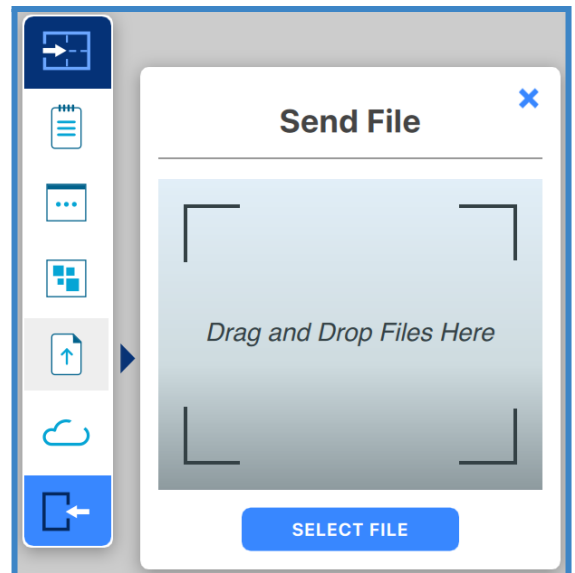

Send Group

Create a Group from the convenience of your device by typing your Group into the text field with your own keyboard. Select 'Send Group' to send your Group to the ThinkHub Canvas. Select 'New Group' to add a new Group.

Send Files

Send media files (images, videos, PDFs) to the ThinkHub Canvas. When you hit the 'Send File' button, it will open your finder window. You can then select a file and tap 'Open' in the finder window. Alternatively, you can simply drag and drop files to the designated drop zone or directly to the ThinkHub Canvas anytime.

Download Notes

With the T1V app, you have the ability to download Notes from the ThinkHub Canvas. When you select 'Download Notes,' you are presented with the option of downloading individual Notes or all Notes. The Notes data will then be saved to your default downloads location (see settings) in a CSV file.

Download Files

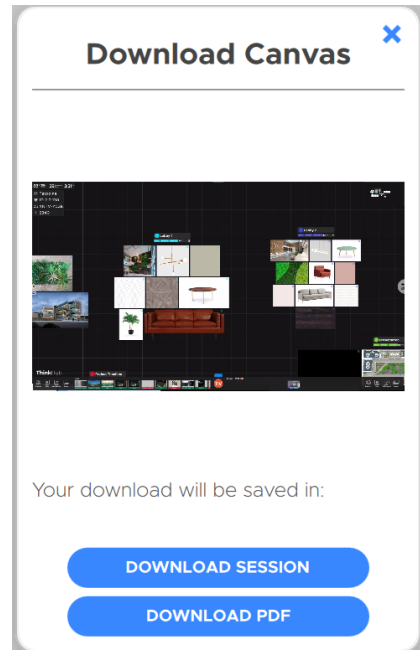

You also have the ability to download files from the ThinkHub Canvas. When you select 'Download Files,' you are presented with the option of downloading specific files or all files. The files will then be saved to your default downloads location (see settings).

Download Canvas

You can download a PDF of the entire Canvas. When you select the 'Download PDF of Canvas' option, it will open the file browser window. You can then name your file, add a tag (optional), and select where you would like the file to be saved. A PDF of the Canvas will then be saved to the desired location.

You also have the ability to save your ThinkHub Canvas directly to your laptop or mobile device, so you can securely carry your ThinkHub Canvas with you and resume your work on a different ThinkHub without the use of a network or cloud server. To share a saved Canvas to the new ThinkHub, simply drop the ThinkHub file (.t1vx) to the Canvas via the T1V app, just as if you were sending any other file to the Canvas.

Zoom In / Zoom Out

When remotely viewing the ThinkHub Canvas with the T1V app, you have the ability to pinch-zoom to control your view of the Canvas. You have the option to use your own device trackpad or device mouse.

This feature works differently depending on which mode of the T1V app you're operating in. When in View mode, the in-room Canvas will not be affected. When in Control mode, you will be able to physically zoom in on areas of the Canvas for all participants (both room and remote) to see.

Download Content

You can download individual content from the Canvas. When you right-click on a piece of content (i.e Note, Sketch, PDF, etc.), it will show the option to "Save as PDF with Annotations" or "Save as File." A PDF of the file will then be saved to the designated download location.

Connected To:

This will display the name of the ThinkHub device you are connected to.

Copy

Click on the 'Connected to...' text to copy your T1V application credentials to your clipboard. You can now easily share this information with remote session participants who are not in the ThinkHub room.

Leave

Select this button to end your connection to the ThinkHub session.

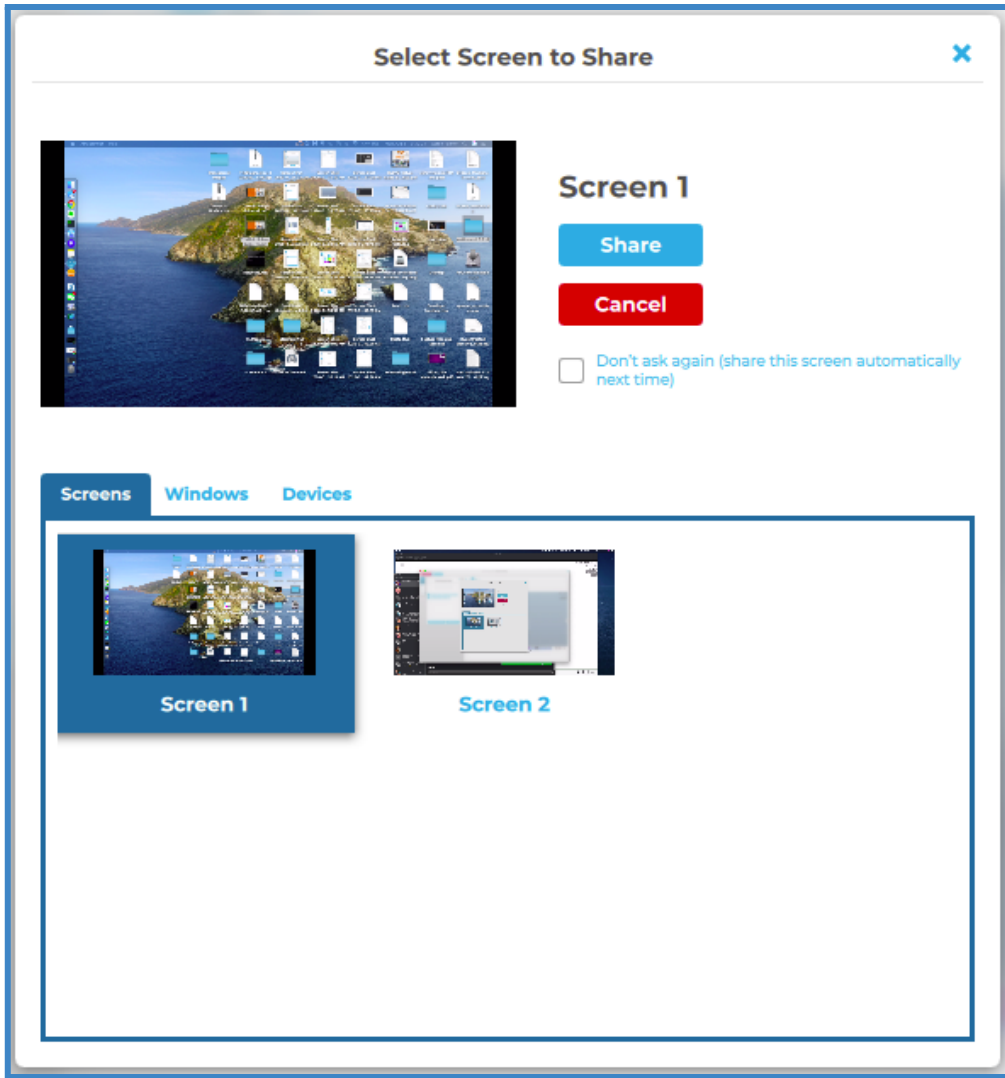

Share

Tap 'Share' to share your device to the Hub display. This will take you to a screen sharing window where you can select to share a window or share your entire device screen.

Selecting a window or screen to share

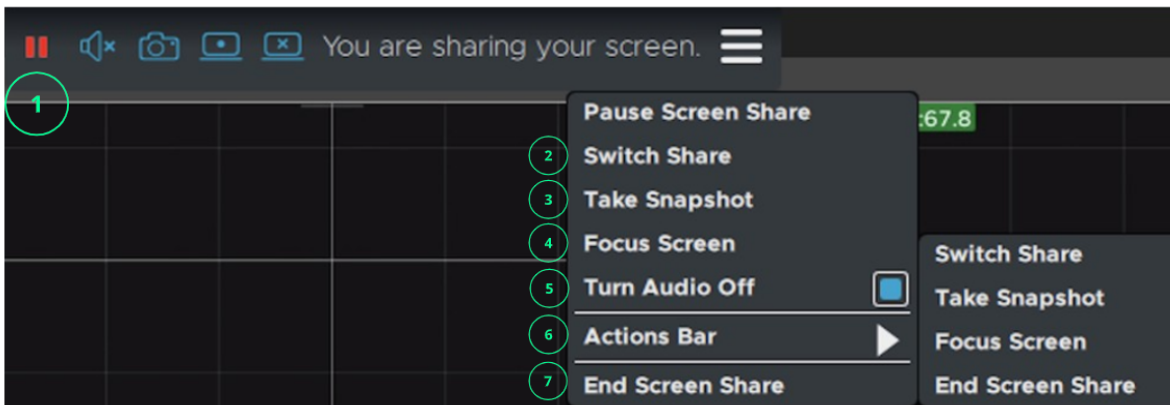

Share a window or your entire device screen. Tap 'Share' when you have selected what content to share from your device. Tap 'Cancel' if you do not wish to share content from your screen.

After you tap 'Share,' you will see a black bar at the top of your device screen. This indicates you are successfully casting your device screen to the ThinkHub or T1V Hub display.

There are additional screen-sharing options available in the hamburger menu.

1. Pause/Resume Screen Share

Pressing the pause button will leave a snapshot of your screen on the T1V room display. The button will turn into a play button so that you can resume screen sharing when ready to broadcast live content. Select the same icon or “Resume Screen Share” to share live content from your laptop.

2. Switch Share

Tap here to switch which content you want to share from your laptop (no need to disconnect!).

3. Take Snapshot

Download a snapshot of your shared screen or window to your computer

4. Focus Screen

Display your device screen front and center on ThinkHub. This tool comes in handy if the session has moved to other parts of the Canvas, and you quickly want to jump back to your device screen. You can also use this feature to quickly switch presenters in a meeting.

5. Turn Audio Off

Select to turn audio on or off while screensharing.

6. Actions Bar

Tailor your screen sharing bar to access the tools you use most in your meetings.

7. End Screen Share

Tap to stop sharing your screen to the ThinkHub or T1V Hub display.

Settings - General

1. My Device Name

This is how your device will appear on the Hub display when connected. Enter the name you wish to appear.

2. Restore to Defaults

Tap here to undo any changes you've made to your settings and restore to T1V's default settings.

3. TouchControl™

TouchControl gives you the ability to control your connected device from a room display. For example, if you wish to advance slides during a presentation, or

you want to be able to make simple edits in programs such as O365 or Google Workspace. Please note: TouchControl currently runs on Mac and Windows laptops. TouchControl will only work when sharing your entire device screen.

4. In-App Notifications

You can choose to enable or disable the in-app notifications. Notifications include scheduled meetings, session ending alerts, etc...

5. Email Notifications

You can choose to enable or disable the scheduled meeting email notifications.

6. Theme

The T1V application allows you to switch between light mode and dark mode. Dark mode uses a dark color scheme that helps reduce eyestrain.

7. Download Folder

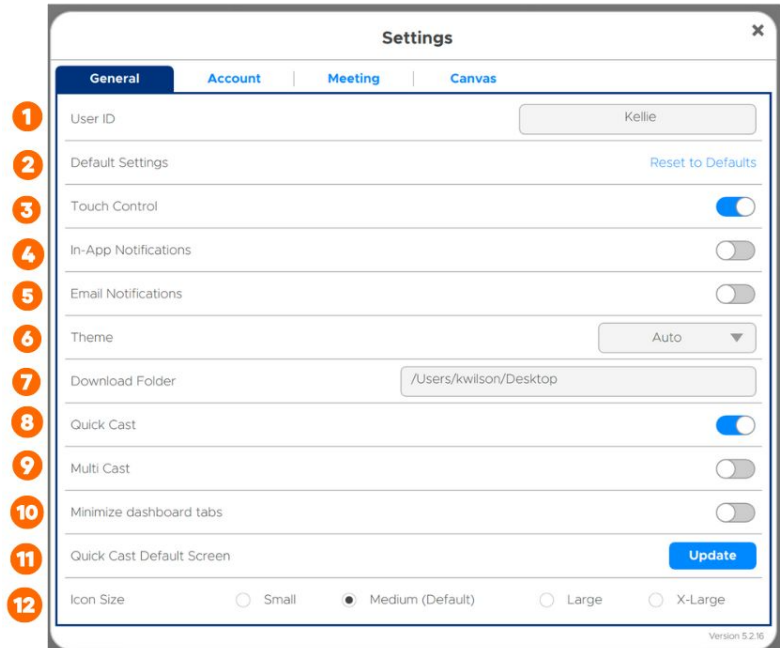

Download Folder™ enables you to select the default download location for all downloaded content.

8. Quick Cast

Toggle on / off to automatically share your device screen to the room display when you connect.

9. MultiCast

Toggle on MultiCast to enable sharing multiple screens or windows to an in-room device simultaneously.

10. Minimize Dashboard Tabs

Minimize your T1V Dashboard Tabs to give yourself more space to work.

11. Quick Cast Default Screen

Select which screen you would like to use as your default screen to share when Quick Cast is enabled.

12. Icon Size

Choose the size of your T1V app icons.

Settings - Registration

1. Email Address

Enter in your desired email address. Registering an email address will allow you to take advantage of the ThinkHub Scheduling.

2. Update Registration

Click the Update Registration button to send a registration request. An email will be sent to that email address to confirm your registration.

3. Registered Addresses

Once the registration has been completed, the registered email address(es) will display in the window.

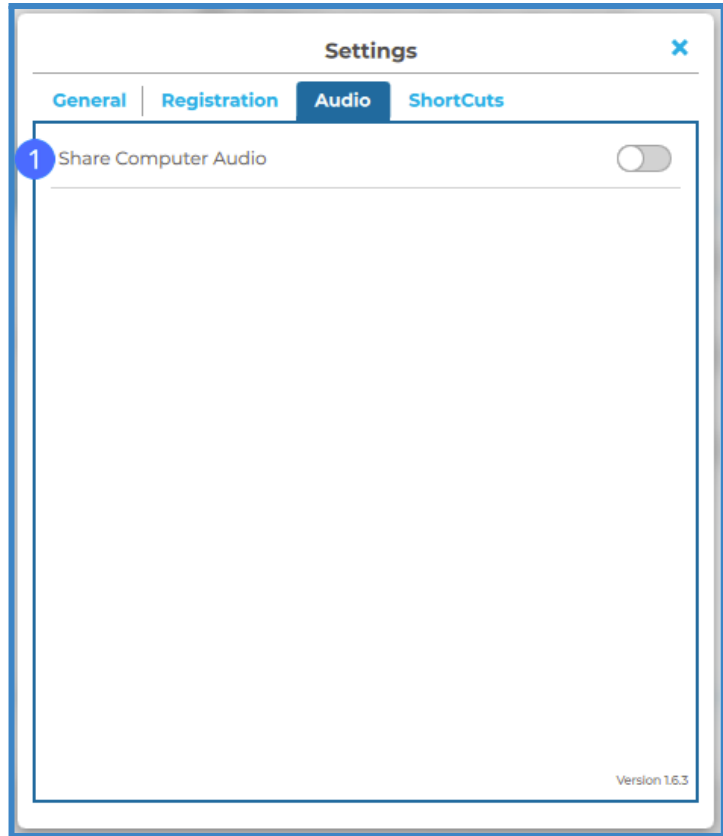

The screenshot displays the 'Settings' window with the 'Account' tab selected. The 'Registration' section is active, showing a form to register an email address. The form includes fields for First Name, Last Name, Company Name, Title, and Email. The email field is pre-filled with 'kwilson@tlv.com'. Below the form are two buttons: 'Update Registration' and 'Manage Subscription'. A table below the form shows a registered address: 'kwilson@tlv.com' with status 'Registered' and a 'Delete' button. Three orange callout boxes with numbers 1, 2, and 3 point to the email field, the 'Update Registration' button, and the 'Delete' button respectively.

Primary	Email	Status	
<input type="radio"/>	kwilson@tlv.com	Registered	Delete

Settings - Audio

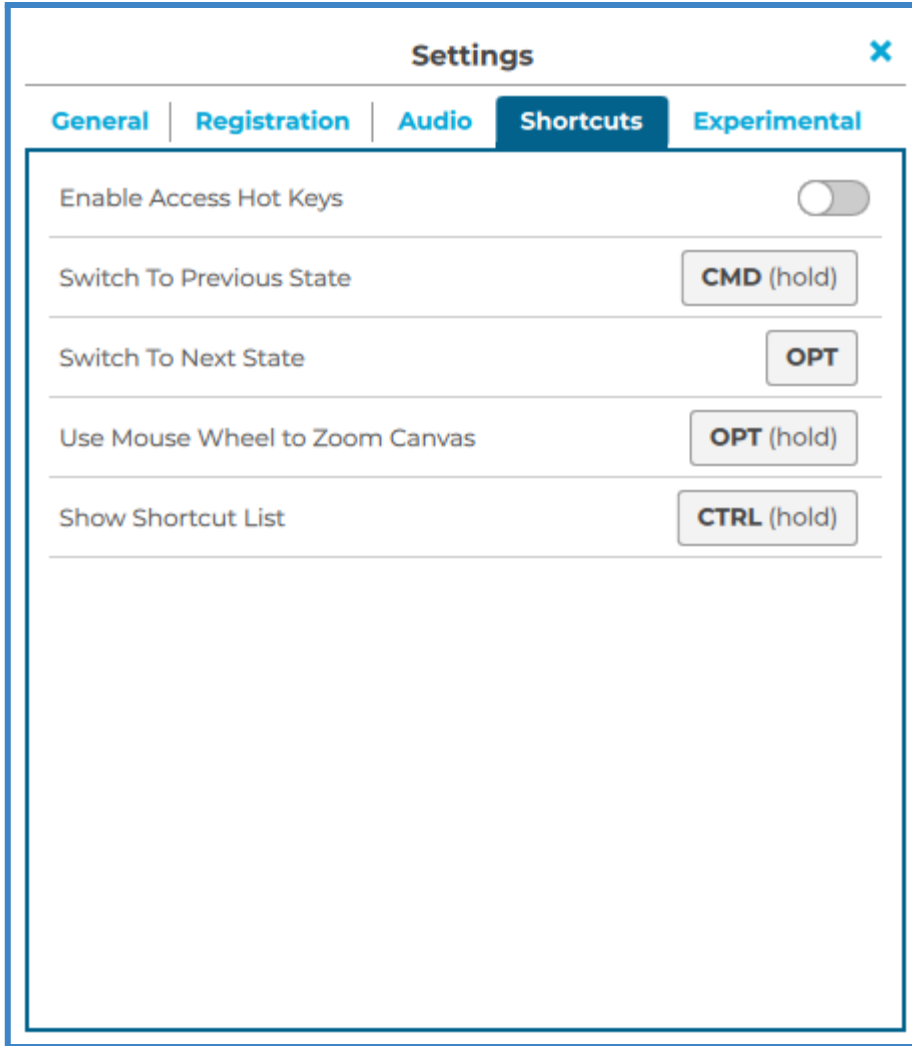

1. Share Computer Audio

Configure your audio to play through the room display (as opposed to playing audio from your individual device). This feature applies to Mac laptops only.

Settings - Shortcuts

Shortcuts give you the ability to easily navigate the T1V app. If you want to change the keys used for a shortcut command, just click on the box and press the button that you want to initiate the command. Shortcuts are disabled by default. Press the “Enable Access Hot Keys” toggle to enable this feature.

Connecting multiple devices

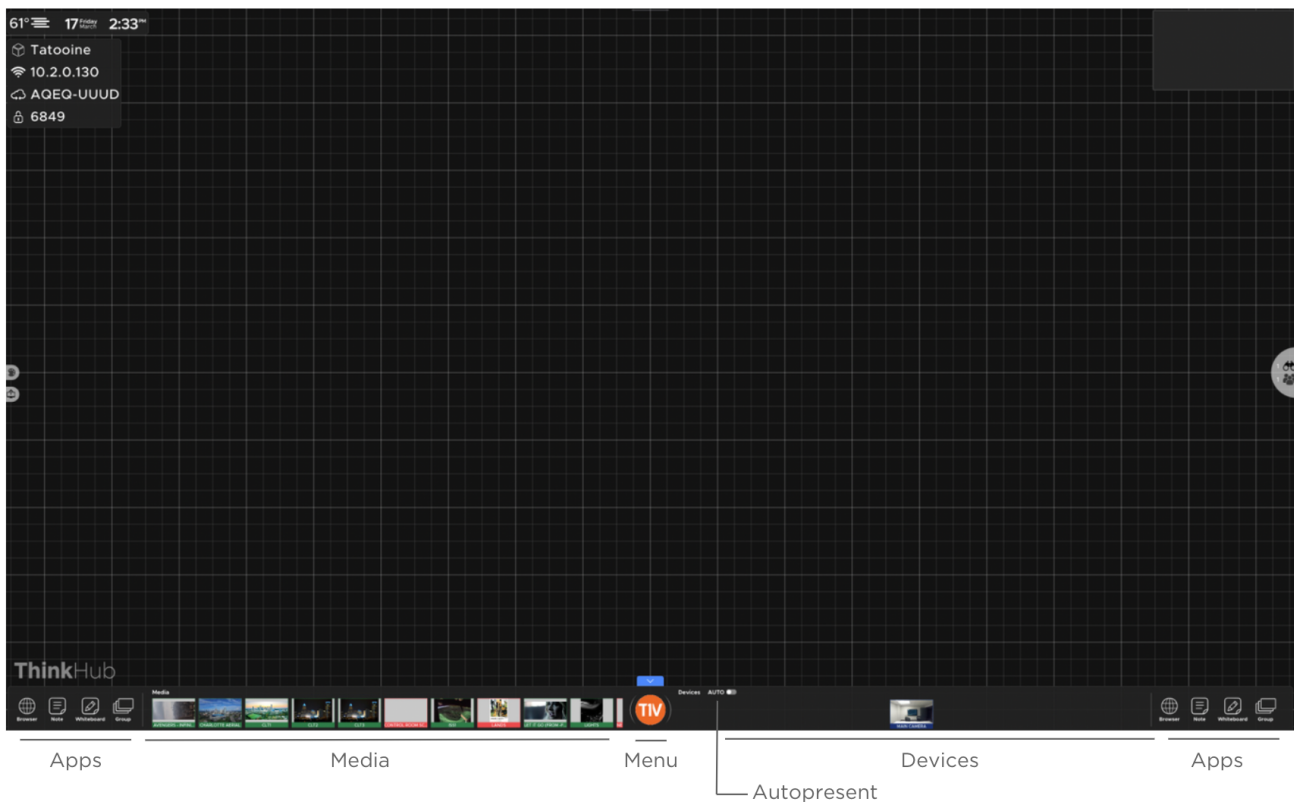

Connecting multiple devices in ThinkHub

ThinkHub supports unlimited device sharing. Depending on your version of ThinkHub, you may only be able to drag / drop a limited number of live device streams to the ThinkHub Canvas at a time. Contact your T1V Rep for details.

Button / Icon Glossary

ThinkHub uses buttons to represent a series of user tools and actions, each represented by a visual icon. ThinkHub icons are used in different places around the ThinkHub Canvas and menu. To help you learn each of these tools and actions, here is a quick reference glossary to help you identify what you can do.

T1V Support

T1V Support is available for phone and email support the following hours:

8am Sunday - 10pm Friday |

8am - 10pm Saturday [EST]

Additionally, T1V Support provides 24/7 remote monitoring of all products, offering a proactive response program should any issues arise.

T1V Support is proud to offer a one-hour call back time. If a request is made outside of regular business hours, you will be contacted by 9am the following day.

All Support requests are handled on a priority basis (emergency vs. non-emergency). An emergency is defined as a problem that immediately affects the operation of the T1V product (i.e., a system crash, or touchscreens are not working). All other requests, such as general questions, should be made during regular business hours.

Please note: T1V Support is available to help with any issues specifically related to T1V products. T1V Support is not intended to be a training session. If additional training is required, please contact your T1V administrator (the designated point person within your organization). T1V Support does not offer support for any third party applications, such as MS Office, Windows, Internet Explorer, Mac OS, and any other programs or operating systems.
