TIVEXPERIENCE INTERACTIVE

ViewHub 101:

Transform Team Spaces with BYOD Technology

T1V Webinar Series

AGENDA

- 1. Intro to T1V + Solutions Overview
- 2. ViewHub 101
- 3. Why ViewHub?
- 4. Q+A

WHO ARE WE?

T1V is a **visual collaboration company** specializing in multitouch, multiuser applications for enterprise, education, and active learning environments.

We're a passionate team of engineering, business, and technology minds - resulting in unrivaled support to our customers from start to finish.

We've been focused on touch technology for over a decade, and we have the one-of-a-kind, proprietary software to prove it.

WHAT WF 1)()?

We develop simple ways for people to tackle complex problems, together.

Our focus is on three major platforms:

- → Collaboration Solutions
- → Active Learning Solutions
- → Interactive Solutions

In addition to these core platforms, T1V works with OEM partners to develop white label products for exclusive distribution.

WHY WE'RE DIFFERENT

Software-based Solutions

- → Less hardware = fewer points of failure
- → Continuous software updates and improvements released quarterly

Intuitive UI / UX

- → Single experience across all products
- → Easy to use, little training required

Flexibility

- → Display agnostic / platform agnostic
- \rightarrow Work with T1V to tailor your solution to you

Best-in-class Support

- → T1V Support team available by phone and email
- → Single point of contact for troubleshooting

CORE PLATFORMS

COLLABORATION

From simple to complex, T1V's suite of collaboration software fits a range of needs. Whether outfitting a classroom, meeting room, large-scale auditorium, or huddle space, our software-based solutions replace antiquated hardware, and continuously evolve with your organization's needs.

ACTIVE LEARNING

Developed to improve the way instructors and students teach, learn, interact, and engage with one another and their shared subject matter. Designed with education and corporate training in mind, this technology supports active learning for groups of all sizes both in-room and remotely.

INTERACTIVE

T1V got its start in developing unique, one-of-akind experiences to 'wow' and impress visitors. Over the years, we've developed a series of software modules that we rebrand to align with your identity - providing interactive experiences that surpass the norm.

Solutions Overview

COLLABORATION

AirConnect.

BYOD CONNECTION SOFTWARE

ViewHub.

BYOD PRESENTATION SOFTWARE

ThinkHub. BYOD COLLABORATION SOFTWARE

ThinkHub. MultiSite

AirConnect. BYOD CONNECTIVITY SOFTWARE

AirConnect is a mobile application that enables wireless device sharing to ThinkHub or ViewHub from a laptop, tablet, or smartphone.

AirConnect.

- → Unlimited licenses | available to all ThinkHub + ViewHub users
- Singular UX | provides a seamless, consistent user experience to all ThinkHub + ViewHub users
- → BYOD wireless device sharing | supports macOS, iOS, Windows, Android, Linux
- → Simultaneous streaming | supports simultaneous device connections to ThinkHub and ViewHub
- → Screen or App Window Selection | share your entire device screen, or select a specific App window while you work in the background
- → AirConnect Access[™] | remote users can view and virtually point at the ViewHub Canvas
- Two Network Modes | Direct Mode allows devices to connect to ViewHub on the same network; World Mode allows devices to connect to ViewHub from any network in the world

ViewHub BYOD PRESENTATION SOFTWARE

ViewHub is a wireless presentation tool that enables users to share content from device screens onto a single display for seamless group meetings. Share multiple device screens at the same time, no wires required.

COLLABORATION

ViewHub_m Key features

- → Easy Presentations | wireless screen mirroring + presentation solution
- → **BYOD wireless device sharing** | supports macOS, iOS, Windows, Android, Linux
- → Simultaneous Streaming | supports four simultaneous 1080p device streams; up to 16 1080p streams for ViewHub Pro
- → Centralized Control | Web-based administrative control console for large-scale rollouts
- → MultiPanel | power up to two displays; ViewHub Pro can power up to 12, depending on display type
- → **Privacy** | optional password-protected access
- → Hardware-Agnostic | compatible with major touch display brands; single panel or multipanel configurations
- → AV Control Integration | option to integrate with AV control systems

ThinkHub BYOD COLLABORATION SOFTWARE

ThinkHub is a digitized, multitouch collaboration tool that consolidates all the moving pieces of teamwork: the devices, applications, people, ideas, and content that are critical to achieving great work.

ThinkHub Key features

- → Interactive Canvas | expands 20x the surface area of the physical touchscreen, draw directly on the Canvas for digital whiteboarding
- → **BYOD wireless device sharing** | supports macOS, iOS, Windows, Android, Linux
- → Annotation toolset | annotate anything on the Canvas, including live feeds
- → Built-in Apps | Notes, Sketches, Web Browser
- → Easy Content Sharing | share content from a USB on the fly, or select from integrated network drive or cloud server
- → Quick Start | no session prep required just tap and go, intuitive interface means zero to little training required
- → Hardware-Agnostic | compatible with major touch display brands; single panel or multipanel configurations

COLLABORATION

ThinkHub_m

ThinkHub solutions are highly flexible and scalable - depending on your needs, we've developed Add-Ons that you can layer into your core ThinkHub system:

ThinkHub MultiSite

Real-time, Canvas-to-Canvas remote collaboration sessions for up to 10 locations at a time. Any site can utilize any display configuration; different network options available for enterprise of SMB.

Additional Options

Hardline InputsCalendar IntegrationCrestron / AMX ControlADA Support

ThinkHub VC

Integration with in-room (Polycom, Cisco) or software-based (WebEx, Skype For Business, Zoom) systems. Option for built-in ThinkHub VC included with ThinkHub MultiSite.

Skype for Business

ribult WebEx ZOOM

LEARNING ACTIVE

ThinkHub CONNECT. ACTIVE LEARNING ROOM TECHNOLOGY

ThinkHub Connect is a hybrid of ThinkHub, ViewHub, and AirConnect technology, all working in tandem to provide instructors and students a way to actively engage with their curricular content and with each other.

ThinkHubConnect.

- → Total Connectivity | all devices and displays are connected for seamless interaction between instructors and students
- → MultiPurpose | Instructors can use ThinkHub stations as presentation and lecture tool; can also monitor and broadcast ThinkHub and ViewHub station activity to all student stations
- → **BYOD Friendly** | supports all student devices (macOS, iOS, Windows, Android, Linux)
- → Mobility | ThinkHub Tablet gives instructors the freedom to access and control content from anywhere in the room
- → **Remote Learning** | engage remote instructors and students via AirConnect and ThinkHub MultiSite

CTIVE

TVSUITE INTERACTIVE, SEMI-CUSTOM SOFTWARE MODULES

T1V's Suite of interactive solutions optimizes your existing content for touchfriendly applications - making your brand more engaging than ever. Work with us to apply your branding to an existing module, or develop an even more tailored solution with our team.

KEY FEATURES

- → MultiTouch | multiple touch points to support simultaneous interactions happening on different parts of the interactive display
- → MultiUser | software that supports multiple people interacting with the same display at the same time
- → MultiApplication | run multiple applications at the same time, on the same shared interactive display
- → Semi-Custom | tailored experiences that leverage T1V Suite's existing software framework for faster, more affordable deployments
- → Mix and Match | select one or several of our T1V Suite software modules to communicate with your audience; also pair well with T1V collaboration and active learning solutions

BYOD CONNECTION SOFTWARE

ViewHub.

BYOD PRESENTATION SOFTWARE

ThinkHub. BYOD COLLABORATION SOFTWARE

ThinkHub. MultiSite ROOM TO ROOM COLLABORATION

ViewHub

BYOD WIRELESS PRESENTATION

- → Screen mirroring / presentation solution
- → AirConnect app for Windows, macOS, iOS, Android (same app to connect to ThinkHub)
- → Supports AirPlay on any network (Mac / iOS)
- → Password Protected Access (optional)
- → Integrates with AV Control Panels
- → Centralized Web-based Administrative Console
- → Supports 4 simultaneous 1080p device streams at 30 fps; up to 16 1080p streams for ViewHub Pro
- → Application Window or Full Device Screen Sharing
- → Multi-Screen Support (ViewHub can power up to 2; ViewHub Pro can power up to 12, depending on display type)
- → Supports remote participation with AirConnect Access

Key Benefits

- → More efficient meetings | reduce wasted meeting time on setup / follow-up
- → Support remote / global teams | real-time, remote collaboration; shared sessions that teams can resume anytime, any time zone
- → Make presentations more effective | engage your audience, present more memorable content with mixed media
- → Improve collaborative workflow | facilitate work from team to team with ease
- → Support agile improvement | big room planning, process flow visualization
- → Reduce cost of room equipment + maintenance | one solution to suit many needs; ongoing software updates ensures constant improvements to software

ViewHub Demo

COLLABORATION

AirConnect

- → Free to all ViewHub + ThinkHub users
- → After the app is downloaded for the first time, users are automatically notified of all future software updates, which are downloaded to your device from the AirConnect app

AirConnect[™]

SOLUTIONS

OUR WORK

WHO WE ARE SHOWCASE

EXPERIENCE INTERACTIVE

AirConnect is an application that you can install on your laptop, tablet, or smartphone to wirelessly mirror your device screen to ThinkHub or ViewHub.

Once you've installed AirConnect, use your ThinkHub/ViewHub AirConnect credentials (available in the top right corner of the ThinkHub/ViewHub display) to share your device screen.

AirConnect[™]

OPERATES IN TWO MODES

Direct Mode - the user's laptop or handheld device must have a route on the same network to talk directly to the ViewHub device. Direct mode is compatible with a single subnet and with multiple subnets.

World Mode - Where direct mode is not possible (due to network architecture or security constraints), T1V has developed World mode. In World mode, the device running the AirConnect app and ThinkHub only require outbound connections to the T1V AirConnect server. All traffic to this server is encrypted from both devices.

AirConnect in World Mode

Participate via AirConnect from any network in the world

Use cases include:

- → User(s) on a guest network that need to connect their device
- → Remote user(s) that would like to participate by sharing their device desktop and/or viewing the ViewHub host device screen

	AirConnect	•••

#### AirConnect Access[™] for REMOTE PARTICIPANTS

AirConnect View™

AirConnect Point™

View the digital Canvas

Direct attention to a particular piece of content with a virtual pointer

- → Provides remote participants the same ThinkHub controls they would experience in-room
- → AirConnect View[™]:

◆View ViewHub Canvas on Mac, Windows, Android device via AirConnect

- → AirConnect Point[™]:
  - Digital pointer
  - ◆Direct team's attention to particular area of the ViewHub display

#### AirConnect[™] CONNECTING YOUR DEVICE

→ Pick your room / screen from the list of recent connections
→ If you're connecting to a screen for the first time:

**Direct Mode**: type in the IP address **World Mode**: type in the AirConnect Key

### **Air**Connect[™] Broadcasting

When you see this red bar, your screen is being broadcast to the ViewHub display

# Why ViewHub?

#### Why ViewHub?

- → Universally Remote: ViewHub allows any team in any part of the world to remotely view, share, and virtually point in real-time from any office, workspace, huddle room, conference room, regardless of location, network, or device, even mobile.
- → Built for BYOD[™] (Bring Your Own Device): ViewHub is platform-agnostic, supporting mobile device connectivity across macOS, iOS, Windows, Android, and Linux.
- → Seamless Future Integrations: As you work with our products, we offer clear paths for upgrades to our other software as well as additional integrations. Whether you need multipanel walls, a 4K experience, or something else, our team can easily upgrade your services to meet your needs.
- → Intuitive and Easy-to-Use: ViewHub is an interactive, flexible software that is based on the needs of those using it for collaboration. With little to zero training required, ViewHub provides a seamless, interactive experience for any collaboration scenario.

#### **ThinkHub + ViewHub: Better Together!**

#### **Think**Hub.

# **View**Hub 081 · · · · ·

#### **Typical Use Case**

Example: 60,000 sf building with 40 meeting rooms

#### Conference Rooms (3)

Multipanel walls with ThinkHub

Meeting Rooms (12) Single and multipanel walls with ThinkHub + ViewHub

#### └Huddle Spaces (25)

Single panel displays with ViewHub

#### COLLABORATION

#### **ACTIVE LEARNING**

#### INTERACTIVE

- → In-room + Remote collaboration
- → Wireless Presentation
- → Small Large Meeting Rooms
- → Single & Multi-Panel Walls

- → In-room + Remote learning
- → TEAL + SCALE-UP rooms
- → Scalability + Flexibility
- → Small Large Learning Rooms
- → Single & Multi-Panel Walls

- → Semi-custom modules (quick, affordable)
- → 'WOW' branded experiences
- → Single & Multi-Panel Walls
