

CORE USE CASE

Creating a multisite, multicampus active learning environment to enhance cross-campus teaching and learning engagement and collaboration.

DATE OF ACTIVATION

August 2020

PROJECT LOCATION

Athens, OH
Cleveland, OH
Dublin, OH

DESCRIPTION

The Ohio University Heritage College of Osteopathic Medicine is a leader in training dedicated osteopathic primary care physicians who are prepared to address the most pervasive medical needs in the state and the nation. Over the last five years, the Heritage College expanded from a single campus to three campuses. With the use of video conferencing technology, enrollment nearly doubled. The Heritage College sought ways to better connect its faculty and student teams across its three campuses. Powering eight Active Learning Classrooms (ALCs), ThinkHub Education MultiSite expands connectivity and collaboration across all three campus locations.

- (8) ALCs powered by ThinkHub Education MultiSite for campus-to-campus connectivity
- ThinkHub technology leverages the hybrid or HyFlex classroom model for in-room and/or remote teaching and learning
- ALC's provide total space flexibility to faculty for simple room configuration
