ThinkHub[®] MOBILE KIT

› Easy Setup

One person can set up and break down the ThinkHub mobile kit. The power lift accommodates users of any height, and can be raised and lowered with the press of a button.

The computer has an accessible reset switch which allows manual startup of power cycling of the device if necessary. It is a fully enclosed device which can be connected to displays, peripherals and inputs via external ports and cables by the integrator.

› Flexible Configuration Options

The ThinkHub Mobile Kit case converts to a table. The customer can also specify additional branding preferences, such as the ThinkHub UI background, and the kit's bar and case colors.

› Power / Internet Requirements

The kit requires single power outlet and ethernet jack.

Wi-Fi network must provide / allow for:

- Internet connection with steady minimum of 25 mbps download, 25 mbps upload
- Internal network connection with steady minimum of 50 mbps throughput
- Double NAT (network address translation) configurations

› Shipping Requirements / Unit Specifications

One person can set up and break down the ThinkHub mobile kit. The power lift accommodates users of any height, and can be raised and lowered with the press of a button.
