T1V

connect your device
to any T1V solution

T1V enables teams to connect from anywhere. Use T1V app to connect to any T1V collaboration solution - ThinkHub, HubVC, or Hub. Share device screens and content, control the room device, and download content from T1V collaboration solutions to your laptop to resume at a later date.

Start connecting at t1v.com/app

KEY BENEFITS

Hybrid Collaboration
supports blended teams of on-site and remote participants, so everyone can co-create and collaborate from anywhere

BYOD (bring your own device)
supports devices across all major platforms (macOS, iOS, Windows, Android, and Linux)

Software-based Solution
ongoing software updates to deliver the best in collaboration experiences

Seamless User Experience
T1V app is the singular app you use to connect to all T1V collaboration solutions - meaning a consistent user experience in every meeting room

High Performance, Multistreaming
stream multiple devices at the same time, without interruption or interference

Built for Hybrid Teams
Connect and collaborate with your team whether you're working in the same room as the Hub or connecting remotely.

Remote Collaboration
Remote team members can connect, view, share, contribute, co-create, and collaborate alongside their in-room counterparts.

Advanced Content Sharing
Share file-based content, web-based content, Office 365 and G Suite, wireless devices, whiteboard, and more....

BYOD
Supports wireless device sharing across all major platforms: Android, Windows, mac OS, iOS, and Linux.

TouchControl™
Control any connected device from the ThinkHub Canvas for 2-way communication between ThinkHub and connected devices.

Intuitive UI / UX
T1V app is intuitive and easy to use, requiring zero-to-little training.
