T1V to showcase full-featured ThinkHub collaboration and ThinkHub Connect active learning software at InfoComm 2019

InfoComm19, Booth 3971: T1V will showcase its full-featured ThinkHub global enterprise software running xCanvas, MultiSite, and Agile add-on modules, providing unrivaled visual collaboration experiences for enterprise teams. The software company will also showcase its ThinkHub Connect active learning technology for higher education and corporate training environments.

June 12-14, 2019, T1V will exhibit at [InfoComm 2019 at the Orange County Convention Center in Orlando, Florida](#). T1V will showcase ThinkHub, its core collaboration solution, along with a series of add-on modules that further tailor the collaboration solution for specific needs and user outcomes, such as ThinkHub Agile, ThinkHub MultiSite, and ThinkHub xCanvas. T1V will also demonstrate the active learning studio powered by [ThinkHub Connect](#) technology.

[ThinkHub, T1V's core collaboration solution](#), serves as an interactive hub for all of the devices, applications, people, ideas, and content that are essential to today's meeting environments. Whether giving a presentation, running a brainstorming session, or managing a project team, T1V's collaborative software allows you to more deeply engage with your peers and cultivate exceptional work in real-time.

For teams looking for an even more immersive presentation and collaboration tool, **ThinkHub xCanvas** extends the ThinkHub experience to multiple displays. ThinkHub xCanvas provides incredible flexibility to teams who are working with large amounts of data and content - giving them the ability to visualize their work on a massive, interactive surface that can be arranged in any configuration of displays, whether touch or non-touch.

Adam Loritsch, T1V EVP of Sales and Marketing, says, "ThinkHub empowers the most innovative companies in the world to drive more efficient meetings, bring teams together, and reach new levels of collaboration. We're excited to show the InfoComm audience the latest advances to our visual collaboration platform...particularly for global organizations who are looking to unite their dispersed teams."

ThinkHub MultiSite provides real-time, room-to-room collaboration for up to 10 office locations at a time. These globally shared sessions can be saved and resumed at any time, reducing the amount of

resources required for post-meeting follow-ups and pre-meeting preparation.

ThinkHub Agile introduces a specific set of tools created for lean-agile and design thinking teams and organizations, which includes system of record software integration, so users can import/export ThinkHub Agile sessions with third party software like JIRA and CA Rally. Together with ThinkHub xCanvas and ThinkHub MultiSite, these three add-ons enhance the core ThinkHub collaboration solution while meeting specific requirements of the global organization.

For those seeking a new way to educate and learn - whether in higher education or in corporate learning environments - T1V will demonstrate its active learning studio, powered by **ThinkHub Connect** active learning technology. ThinkHub Connect is being adopted for its ability to support multiple teaching and learning styles, while also enabling remote learning across locations and campuses.

Finally, T1V will preview an all-new product at InfoComm: HubVC™. **HubVC** is a simple collaboration board where teams can wirelessly share devices, whiteboard, and video conference - all at the same time. HubVC is being introduced to T1V's collaboration family as a low-cost, easy-to-use collaboration solution designed for small meeting rooms and huddle spaces.

T1V invites you to experience ThinkHub, ThinkHub xCanvas, ThinkHub MultiSite, ThinkHub Agile, ThinkHub Connect, and the all-new HubVC at InfoComm 2019, Booth 3971.

About T1V

T1V is a visual collaboration company specializing in multitouch, multiuser software for enterprise and education markets. The company's collaboration platform includes ThinkHub® multitouch collaboration, ViewHub™ wireless presentation, and AirConnect™ mobile app - all working cohesively to support a seamless, intuitive user experience for both in-room and remote participants. T1V's suite of collaboration software represents total meeting room solutions that replace much of the hardware we equate meeting room technology with today.

T1V ThinkHub Connect™ active learning technology is designed to support a variety of teaching and learning styles, from traditional lecture to team problem-solving and group-based work. The solution also supports collaboration between students located at off-site locations and allows easy content sharing between remote locations.

All T1V solutions are Built for BYOD™ (bring your own device) to support the many devices, programs, and platforms of today's meeting and learning environments. T1V is a leading innovator in large-scale, interactive software technology, with four issued patents and two patents allowed in multitouch, multiuser software.
